Specifications

Coolant capacity (engine only)Standard modulating thermostat rangeMinimum pressure cap	85 liters [23 gal] 77 to 90°C [170 to 194°F] 48 kPa [7 psi]
--	---

Coolant temperature:

Minimum top tank 71°C [160°F]Maximum at engine outlet 100°C [212°F]

Maximum deaeration time	25 minutes
-------------------------	------------

Minimum draw down

Of system capacity 8 percent
