

Fault Code: 1387

SAE J1939 Engine Commanded Shutdown - Condition Exists

 Printable Version

Overview

Codes	Reason	Effect
Fault Code: 1387 PID(P): S117 SPN: 1384 FMI: 11/31 Lamp: None SRT:	The generator set controller detected a shutdown from the Engine Control Module on the J1939 network.	None on performance.

J1939 Data Link Circuit

Circuit Description

This fault code will be logged if the engine is shutdown by anything other than the engine keyswitch.

Component Location

The Engine Control Modules (ECM) are located on a plate that is above the flywheel housing.

Conditions For Running The Diagnostics

This diagnostic runs continuously when the generator set controller is active or when the engine is running.

Conditions For Setting The Fault Codes

The Engine Control Module (ECM) received a shutdown message from the J1939 datalink network.

Action Taken When The Fault Code Is Active

- The generator set controller displays the fault immediately when the diagnostics runs and fails.

Conditions For Clearing The Fault Code

- To validate the repair, start the engine and let it run for 1 minute at no load.
- The generator set controller will turn off the fault code immediately after the user presses reset.
- The "Reset All Faults" command in the recommended Cummins® electronic service tool or equivalent can be used to clear active faults.

Shoptalk

This fault code is information ONLY. Troubleshoot other fault codes that are presently active in the ECM.
