ECM Microprocessor

Circuit Description

The ECM is a computer that is responsible for engine control, diagnostics, and user features.

Component Location

The ECM is bolted to the fuel pump side of the engine and can be located either above the air compressor (high-mount) or above the starter (low-mount).

Shoptalk

This fault code can **only** be caused by an internal ECM problem. Repairs are **not** possible for the ECM.

Refer to Troubleshooting Fault Code t05-111 (</qs3/pubsys2/xml/en/procedures/82/82-t05-111.html>)
