

Fault Code: 135

Oil Pressure Sensor Circuit

 Printable Version

Overview

Codes	Reason	Effect
Fault Code: 135 PID(P): P100 SPN: 100 FMI: 3/3 Lamp: Yellow SRT:	High voltage detected at the oil pressure circuit.	No engine protection for oil pressure.

Oil Pressure Sensor Circuit

Circuit Description

The oil pressure/temperature sensor is used by the electronic control module (ECM) to monitor the lubricating oil pressure. The ECM monitors the voltage on the signal pin and converts this to a pressure value. The oil pressure value is used by the ECM for the engine protection system.

Component Location

The oil pressure/temperature sensor is located on the engine block to the left of the fuel filter, behind the air compressor.

Shoptalk

Does the fault occur **only** in cold weather? If so, allow the oil to warm up and see if the fault goes inactive.

Refer to Troubleshooting Fault Code t05-135 (</qs3/pubsys2/xml/en/procedures/82/82-t05-135.html>)
