Starter Solenoid Lockout Relay Driver Circuit

 Printable Version

Overview

Codes	Reason	Effect
Fault Code: 474 PID(P): S237 SPN: 1321 FMI: 2/2 Lamp: Yellow SRT:	Either low voltage detected when + 12 VDC are commanded or voltage detected when no voltage is commanded.	Either the engine will not start or the engine will not have starter lockout protection.

Starter Solenoid Lockout Relay Circuit

Circuit Description

The starter solenoid lockout relay driver circuit is a solenoid driven by the electronic control module (ECM) that electrically isolates the starter motor relay when the engine is running.

Component Location

Refer to an OEM diagram for the exact location.

Refer to Troubleshooting Fault Code t05-474 (/qs3/pubsys2/xml/en/procedures/82/82-t05-474.html)
