General Information

WARNING

**Troubleshooting presents the risk of equipment damage, personal injury or death.
Troubleshooting must be performed by trained, experienced technicians.**

This section utilizes Troubleshooting Symptoms as a guide to locate a problem and direct the end user to the correct procedure for making the repair.

Troubleshooting Symptom Trees are based on the following assumptions.

- The components have been installed according to the manufacturer's specifications.
- The easiest repairs are done first.
- All generic solutions are designed for the most common applications.

Refer to the Original Equipment Manufacturer's service manual for their specifications.

To utilize troubleshooting symptom trees, complete the following steps.

1. In Section TS - Troubleshooting Symptoms, locate the symptom that requires diagnosis.
2. Locate the probable cause in the left column then navigate to the procedure referenced in the right column for a corrective action.
 - The left column of boxes in the Troubleshooting Symptom Tree indicates a probable cause of the problem, starting at the top with the simplest and easiest to repair, and continuing downward to the most difficult.
 - The right column of boxes provides a brief description of the recommended corrective action for the associated probable cause, and provides a reference to the procedure that hosts those instructions.
3. Continue through the symptom tree until the issue has been resolved.
