New Wide-Roller Cam Follower

New Wide-Roller Cam Follower

Warranty Statement

The information in this document has no effect on present warranty coverage or repair practices, nor does it authorize TRP or Campaign actions.

Contents

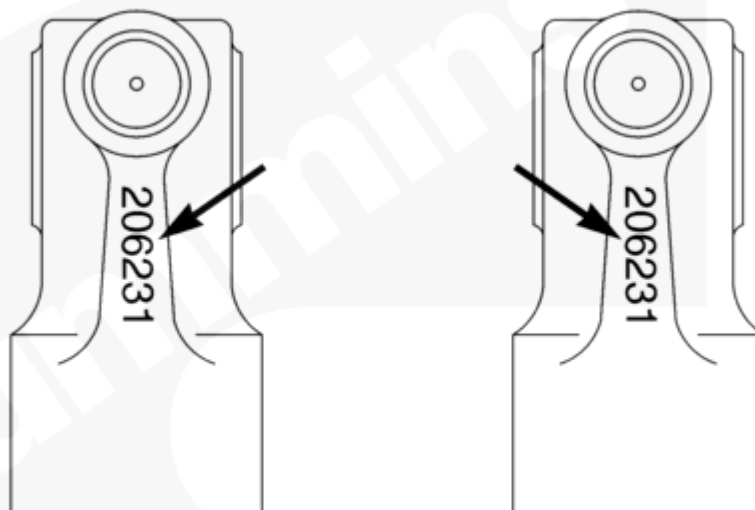

This Technical Service Bulletin is a parts announcement which details changes to injector cam followers used on K19 Engines and describes the following:

- Application considerations
- Differences between the existing cam follower and the wide-roller cam follower
- Repair practices for the replacement of the existing cam followers
- Part numbers for the existing and replacement cam followers.

Special consideration **must** be given to K19 engines that run in continuous duty applications, operating with light loads for long periods of time.

Note : This is a product improvement **not** subject to campaign.

Figure 1, Cam Follower Forging Part Number

Both cam followers have the same forging, Part Number 206231, illustrated in Figure 1. Do **not** use the forging part number as a guide.

Figure 2, Cam Follower Roller Differences

In Figure 2, the existing standard cam follower is on the left hand side of the illustration and the wide-roller cam follower is on the right hand side. The measurements in the illustration are for reference **only**.

Figure 3, Cam Follower Pin Orientation

⚠ CAUTION ⚠

To reduce the possibility of damaging the camshaft do not mix wide-roller cam followers with standard roller cam followers.

The standard roller cam follower, in Figure 3, located on the left hand side of the illustration, has a groove in the lever for pin and roller orientation. The wide-roller cam follower on the right hand side of the illustration, has pin and roller orientation but does **not** have a groove in the lever.

When installing the wide-roller cam follower the entire lever **must** be replaced because the roller will **not** fit into the standard roller lever casting.

The wide-roller cam follower, Part Number 3081413, includes the socket, roller, lever, and pin and replaces the standard cam follower, Part Number 3039163.

The wide roller is **only** in the wide-roller cam follower.

The parts package is in service and production.
