Recommended Cummins® Service Tools

- INLINE™ 7 Data Link Adapter Kit, Part Number 5299899
- Data link adapter for split network, Part Number 5394863
- Cummins Guidanz™ electronic service tool

Additional Service Items

- Mobile device
- Wireless or cellular network

General Information

Note : See the following to download the latest version of the Cummins Guidanz™ electronic service tool. <https://www.cummins.com/support/electronic-service-tools-support/guidanz-support> (<https://www.cummins.com/support/electronic-service-tools-support/guidanz-support>)

Note : Due to the number of various smart handheld devices, this procedure has been written to be generic. **Not** all illustrations within this procedure will represent the application being worked on.

The route parameter manager calibration update can be performed by Cummins Guidanz™ electronic service tool.

Preparatory Steps

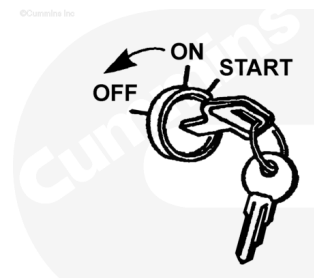

- Turn the keyswitch to the OFF position.
- Connect the INLINE™ 7 data link adapter to the vehicle service tool connector.
- Turn the keyswitch to the ON position.
- Launch the Cummins Guidanz™ electronic service tool on a mobile device. Connect it to the INLINE™ 7 data link

adapter via a bluetooth connection.

Note : Cummins Guidanz™ electronic service tool can not perform the map update procedure.

Note : It can take up to one hour to complete the route parameter manager calibration update. It is recommended there be a constant power supply to the mobile device for the duration of the procedure.

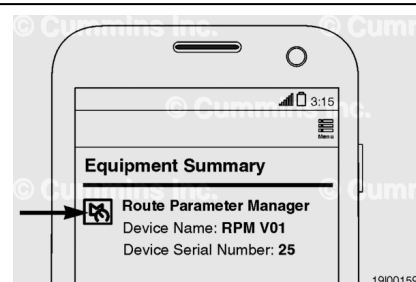

Note : It is recommended to have a constant power supply to the vehicle batteries during the update procedure.

19800470

Calibrate

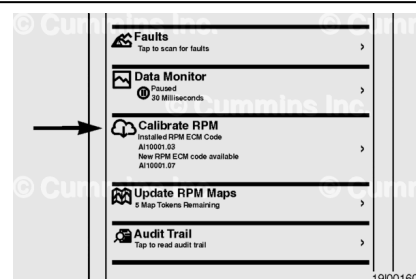

From the main screw of the Cummins Guidanz™ electronic service tool, select Route Parameter Manager Module.

19I00159

From the options available, select Calibrate RPM.

Note : An active connection to a wireless or cellular network is required to check for code update availability. When using a cellular network, additional data charges can apply.

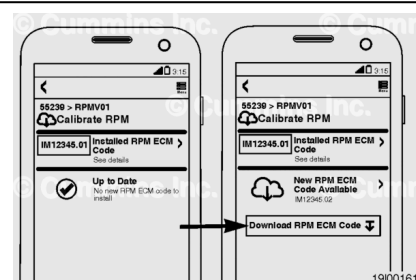

19I00160

Cummins Guidanz™ electronic service tool will perform a check between the current software in the route parameter manager module and any software available in the Cummins® database.

If new software is available, select Download RPM Engine Control Module (ECM) Code.

Note : An active connection to a wireless or cellular network is required to check for code update availability. When using a cellular network, additional data charges can apply.

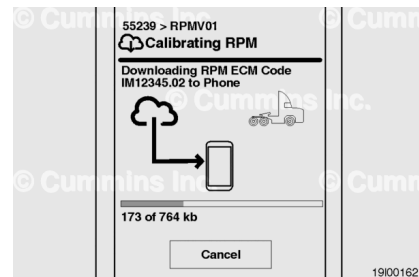

Note : Access to mobile device storage is required.

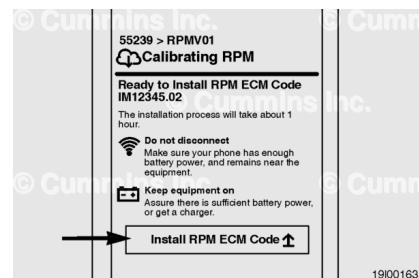

19I00161

Cummins Guidanz™ electronic service tool will download the calibration to mobile device storage.

Note : Access to mobile device storage is required.

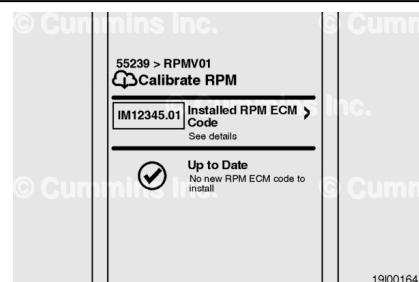

Select Install RPM ECM Code to initiate the calibration download to the route parameter manager module.

Once the calibration process is complete, Cummins Guidanz™ electronic service tool will perform a check between the calibration available in the database and the calibration installed in the route parameter manager module.

Note : An active connection to a wireless or cellular network is required to check for code update availability. When using a cellular network, additional data charges can apply.

Finishing Steps

- Turn the keyswitch to the OFF position.
- Disconnect the INLINE™ 7 data link adapter from the vehicle service tool connector.
- Turn the keyswitch to the ON position.
