Cummins Inc. Service Information Regulation (SIR) Field Letter - Emission Compliance

Cummins Inc. Service Information Regulation (SIR) Field Letter - Emission Compliance

Introduction:

This document is offered to provide an overview of the Service Information Regulation (SIR) regulation and how Cummins Inc. will comply.

Product Affected (Including hybrid engines):

(Engine Manufacturer Diagnostics (EMD) or Heavy Duty (HD) On Board Diagnostics(OBD)/OBD II)

2013 to Present (OBD):

- B6.7 CM2350 B121B
- B6.7 CM2450 B155B
- B6.7N CM2380 B150B
- ISB6.7 CM2350 B101
- ISL9 CM2350 L101
- ISV5.0 CM3230 V104
- ISX12 CM2350 X102
- ISX12N CM2380 X120B
- ISX15 CM2350 X101
- L9 CM2350 L116B
- L9 CM2450 L126B
- L9N CM2380 L124B
- L9N CM2380 L142B
- X12 CM2350 X119B
- X12 CM2450 X137B
- X15 CM2350 X114B
- X15 CM2350 X116B
- X15 CM2450 X124B
- X15 CM2450 X134B

2013 to Present (EMD+):

- ISB6.7 G CM2180 B118
- ISL G CM2180
- ISX12 G CM2180 EJ

2007 to 2012 (EMD Unless otherwise specified):

- ISB CM2150
- ISB6.7 CM2250
- ISC CM2150
- ISC8.3 CM2250
- ISM CM876
- ISL CM2150
- ISL9 CM2250
- ISX CM871
- ISX15 CM2250 (OBD – Engine Family 1 **Only**, Identified by CPL 2732)

Beginning with the EPA 2013 engine launches, federal regulation requires changes to some of the methods in which Cummins Inc. delivers service information, including INSITE™ electronic service tool and technical training for automotive engines. These changes are due to Service Information Regulation (SIR) and as a result, service information **must** be made available to **all** interested parties in the United States of America (U.S.A.) and Canada.

This regulation impacts all U.S. Environmental Protection Agency (EPA) certified on-highway automotive Cummins® engines built since 2007.

The purpose of Service Information Regulation is to make sure that engine manufacturers make information that would enable repairs, service, and maintenance of On-Board Diagnostic (OBD) certified engines, systems, and other emission related engine components available to the service and repair industry.

In essence, Cummins can **not** provide service information to distributors/dealers and exclude other interested parties.

Any interested party is defined as:

- **Any** person or entity engaged in the business of service or repair of heavy duty motor vehicles, engines, or transmissions
- **Any** individual or business engaged in the diagnosis, service, and repair of a heavy duty engine, who is **not** directly affiliated with Cummins Inc. authorized network
- **Any** licensed or registered person or entity engaged in the business of service or repair of passenger cars, light-duty trucks, or medium-duty motor vehicles, engines, or transmissions
- **Any** commercial business or government entity that repairs or services its own vehicle fleet(s)
- Tool and equipment companies.

The Service Information Regulation mandates the sale of information be made available at a fair, reasonable, and non-discriminatory price. As such, the published suggested list pricing to the interested parties for access to the website, service information, tools, and training has been established to be fair and reasonable to meet the Service Information Regulation requirements.

QuickServe® Online (QSOL) is the primary method for providing service information. Additionally, QuickServe® Store has been made available for the online purchase of service information, INSITE™ electronic service tool, and Cummins® Virtual College. Distributors that provide training will be required to allow **any** interested party to attend classroom training for impacted automotive on-highway engines.

QuickServe® Website and Publications:

There are two subscription offerings available to interested parties on QuickServe® Online:

1. Unlimited Service Plan

- The Unlimited Service Plan is available for interested parties.
- A subscription under this plan will give the user:
 - access to parts and service information
 - access to **all** engine serial numbers.
- Subscription periods and suggested list pricing:
 - seven days for \$50 USD
 - one month for \$200 USD
 - one year for \$1200 USD.

2. Limited Owners Plan

- The Limited Owners Plan is targeted to single owner/operators.
 - access to parts and service information
 - access for **up to five engine serial numbers**.
- Subscription periods and suggested list pricing:
 - no expiration - FREE.

To purchase with credit card online, go to

https://quickservice.cummins.com/info/pcv/subscription_plans.html

QuickServe® Store (Online sale of publications, INSITE™ electronic service tool, and training)

- The QuickServe® Store allows interested parties to purchase the following items with a credit card:
 - Cummins® engine manuals
 - Cummins® service training (CVC - Cummins® Virtual College)
 - INSITE™ electronic service tool software CD with Cummins® Virtual College training
 - Expert Diagnostic System (EDS)

The URL for the store is <https://store.cummins.com>

The QuickServe® Store is a public website; it is accessible without a subscription.

INSITE™ Electronic Service Tool:

INSITE™ Basic, INSITE™ MR-HD Automotive LITE or INSITE™ MR-HD Automotive Pro annual subscriptions are available for sale to **any** interested party requesting the tool within the U.S.A. and Canada.

Two versions of the INSITE™ electronic service tool have been developed to be offered to any interested party:

- MR-HD Automotive Lite – limited access version that provides access to engines covered under SIR but does **not** allow Engine Control Module (ECM) calibration download capabilities.
- MR-HD Automotive Pro – full access version that provides access to engines covered under SIR, including ECM calibration download.

Interested parties, that are **not** Distributors, Dealers or National Accounts/Fleets, shall be allowed to purchase only the MR-HD Automotive versions of INSITE™ electronic service tool. Other versions, such as INSITE™ MR-HD Plus electronic service tool and INSITE™ Service Plus electronic service tool, exist but provide access to engines not covered under SIR regulations and therefore should not be made available to interested parties.

INSITE™ Electronic Service Tool Terms of Use:

- INSITE™ electronic service tool is a very powerful tool that, amongst other functionalities, possesses the ability to either update an existing ECM calibration to the latest available ECM calibration, or to change the existing ECM calibration to a different ECM calibration.
- Terminology:
 - ECM calibration: this is distinguished by a pair of letters followed by a sequence of numbers. (a12345.01)
 - Base Code: the six alphanumeric characters before the decimal. (ab12345)
 - ECM calibration Revision: the two numbers following the decimal. (.01)
- It is critical to understand the difference between updating an ECM calibration and changing an ECM calibration.
- ECM Calibration Update - going from ECM calibration ab12345.01 to ECM calibration ab12345.02. Specifically, the change is seen above where the base code stays the same and the revision number changes. This does not require a Fleet Count. Examples for updating an ECM calibration are below.
 - A product improvement/fix has been made to the ECM calibration.
 - A new feature has been made available in the ECM calibration.
- ECM Calibration Change - going from ECM calibration ab12345.01 to ECM calibration ba54321.01. Specifically, the change is seen above where the base code is changed from how it was originally presented. The revision is **not** a factor when the base code changes. This action requires a Fleet Count. Examples for updating an ECM calibration are below.
 - Customer requests to uprate/derate the engine rating.
 - A product improvement/fix or new feature can **not** be installed in previous engines without hardware change(s).
- A repair required ECM calibration change can only be performed by interested parties when a Service Publication (i.e. Service Bulletin, Installation Instruction or Technical Service Bulletin) directs the need for a Fleet Count to be utilized.

- At the time of request, the interested party will be required to provide the Service Publication number to the distributor before the sale of the Fleet Count is completed.
- Fleet Counts are provided by Distributors, when a requirement exists, to allow the changing of an ECM calibration or re-establishing an ECM calibration in the event the ECM has been ROM-booted.
- A Fleet Count is a single use item, once a Fleet Count has been utilized a new Fleet Count will need to be obtained.
- Zap-Its are tools that are used to remove passwords placed on the ECM to prevent unauthorized or damaging changes from taking place.
- Where a Fleet Count or Zap-It is required, an individual must have a Promotion ID, taken the necessary training, have the INSITE™ Pro license and obtain the approval of their local distributor.
- Training requirements will differ according to functionality or password levels (Basic, Lite, and Pro) desired.
- The QuickServe® Store will provide for sale INSITE™ electronic service tool software CD bundled with INSITE™ electronic service tool Cummins Virtual College. Once the customer has purchased the bundle online, INSITE™ electronic service tool software CD and INSITE™ electronic service tool Cummins® Virtual College will be shipped to the customer with instructions regarding how to register and obtain the passwords for the software.

Registration Process:

- Visit the www.cummins.com Service Locator to locate the nearest authorized distributor location.
- Call the distributor location INSITE™ electronic service tool administrator to register and purchase the annual subscription.
- Once the interested parties complete the Cummins® Virtual College INSITE™ electronic service tool training, they **must** register their software with their local Cummins Inc. distributor and purchase the annual subscription, which includes provision of the necessary passwords to use the software.
- Cummins® Virtual College INSITE™ electronic service tool training and/or relevant classroom training **must** be verified before the sale of password subscriptions.

Pricing:

- QuickServe® Store will provide suggested list pricing.
- Purchase from a distributor remains the preferred method.
- Suggested list price for INSITE™ MR-HD Automotive Lite or Pro annual subscription is posted on the QuickServe® Store.
- Prices are subject to change. Some distributors offer more comprehensive support packages for INSITE™ electronic service tool. These vary by distributor.

Each distributor **must** provide for sale INSITE™ Basic, MR-HD Automotive Lite, or Pro, and Cummins® Virtual College to any interested party who wants to purchase it. See the definition of "Interested Party". The INSITE™ electronic service tool registration process will remain the same as it is presently. The annual subscription will be registered and paid at the distributor.

Expert Diagnostic System (EDS)

Expert Diagnostic System (EDS) is available for sale to any interested party requesting the tool within U.S and Canada. See the definition of "Interested Party".

Registration Process:

- For manual registration of Expert Diagnostic System (EDS), distributors would need to do the following:
 - Register interested party to QuickServe® Online (QSOL)
 - Fill out help desk ticket on QuickServe® Online (QSOL) requesting for Expert Diagnostic System (EDS) access for the QuickServe® Online (QSOL) account
- For electronic registration of Expert Diagnostic System (EDS)
 - Interested party to register for QuickServe® Online (QSOL) and Expert Diagnostic System (EDS)
 - Use QuickServe® Online (QSOL) store using the weblink below.

Note : <https://store.cummins.com> (<https://store.cummins.com>)

EDS Subscription Plan:

- Subscription periods and suggested list pricing:
 - Seven days for \$100 USD
 - One month for \$400 USD
 - One year for \$2000 USD

Training:

Distributors are required to allow **any** interested party to attend classroom product training. See the definition of "Interested Party". Distributors are allowed to charge a fair and reasonable cost for the training and **any** required training materials. Interested parties who request training **must** be informed of classroom training availability. Locations are **not** required to offer hands-on qualification to other interested parties. Other interested parties are **not** allowed to submit warranty claims.

Questions:

For questions regarding SIR, submit a QuickServe® Online Help Desk Ticket titled "SIR".

FAQ for Service Information Regulation (SIR):

What is Service Information Regulation (SIR)?	
Q1:	What is Service Information Regulation (SIR)?
A1:	Service Information Regulation, also known as "SIR", is a government requirement that mandates engine and vehicle manufacturers to provide service information to any interested party for the successful repair, service, and maintenance of engines equipped with diagnostic systems and other emission-related components.
Q2:	What does the term "Interested Party" mean to Cummins Inc.?
A2:	An Interested Party or Covered Persons includes any person or entity engaged in the service or repair of vehicle, any business or entity that repairs its own vehicles, tool manufacturers, and any person or entity engaged in the manufacture or remanufacture of parts. In short, very few entities are excluded.
Q3:	Who are the government agencies that regulate SIR?
A3:	The Environmental Protection Agency (EPA) and California Air Resource Board (CARB) both have regulations concerning the availability of service information, tools, and training.

Q4:	What fines may be imposed for not complying with Service Information Regulation (SIR)?
A4:	Both EPA and CARB can issue significant financial penalties for violation of the regulation.
Q5:	What regions are affected by Service Information Regulation (SIR)?
A5:	United States of America and Canada.
Q6:	For what products do Service Information Regulation (SIR) regulations apply?
A6:	Products that SIR Regulations apply to: 1. Year 1994 and later passenger cars, light duty trucks, medium duty engines, and vehicles equipped with OBD II systems. 2. Year 2007 and later heavy duty products equipped with EMD+ or HD OBD systems.
Q7:	What are the key components of Service Information Regulation (SIR)?
A7:	Service Information Regulation (SIR) includes publications, product training, website access, and tools.
Pricing	
Q8:	What are the rules concerning the price of items covered by Service Information Regulation (SIR)?
A8:	Pricing is to be fair, reasonable, and non-discriminatory. The Cummins Inc. approach for Service Information Regulation (SIR) has been to provide suggested list pricing to meet this requirement. Distributors remain the preferred supplier of all items, including those covered by Service Information Regulation (SIR). To be sure of compliance with the regulation, Cummins Inc. maintains the QuickServe® Store. All items listed on the QuickServe® Store are at suggested list price.
Q9:	Can a distributor exceed list price?
A9:	Distributors should not exceed suggested list price to remain in compliance with fair, reasonable, and non-discriminatory.

Q10:	Can a customer register INSITE™ electronic service tool software on the QuickServe® Store?
A10:	No. Customers can purchase INSITE™ electronic service tool installation CD and Cummins® Virtual College training from either the distributor or the QuickServe® Store, however the sale of the functionality and registration will continue to be handled by distributors.
Q11:	What are the list prices for all Service Information Regulation (SIR) related products and services?
A11:	Reference these websites to view QuickServe® Online subscriptions and QuickServe® Store list prices: QSOL: https://quickserve.cummins.com/info/pcv/subscription_plans.html QuickServe® Store: https://store.cummins.com/store/index.html
Q12:	Whom should support questions by interested parties on INSITE™ electronic service tool, QuickServe® Online, and other items covered by Service Information Regulation (SIR)?
A12:	The standard support that is presently provided remains. This support includes the QuickServe® Help Desk, Electronic Tools Help Desk, Cummins® Virtual College Help Desk, and standard distributor support.
Q13:	How will Cummins Inc. communicate information regarding Service Information Regulation (SIR)?
A13:	Information, including a Service Bulletin, will be posted on QuickServe® Online.
Website	
Q14:	Are distributors required to provide for sale QuickServe® subscriptions to interested parties?
A14:	Yes. Cummins Inc. also makes sure of availability by making QuickServe® online subscriptions available for purchase at the QuickServe® Store.

Q15:	Are QuickServe® subscriptions available for purchase through the QuickServe® Store?
A15:	QuickServe® Online has two subscription plans: Unlimited Service and Limited Owners Plans.
Q16:	What is the QuickServe® Store?
A16:	The QuickServe® Store provides interested parties with an alternate option of purchasing engine manuals, service training, and electronic tools with a credit card. This option is not intended to replace present purchase processes for customers who have a business relationship with their distributors.
Q17:	How will customers know how to contact their local distributor?
A17:	Customers can use the Service Locator to determine the nearest Cummins Inc. distributor. A link to the Service Locator is available at www.cummins.com , store.cummins.com , and quickservice.cummins.com .
Q18:	How are passwords reset for Unlimited Service and Limited Owners plans?
A18:	The customer will see on his screen that his subscription has expired. The customer will go through a renewal process that was similar to the original registration process.
Q19:	What languages are supported on the QuickServe® Unlimited Service & Limited Owners plans?
A19:	The QuickServe® Online interface supports 32 languages, translations available vary by engine model. Content for specific engine models varies.
Electronic Tool	
Q20:	What prevents the interested party from getting the INSITE™ MR-HD Automotive Pro version?
A20:	All Cummins Inc. distributors within the U.S.A. and Canada must provide for sale, register, and support INSITE™ MR-HD Automotive Pro license to any interested party who requests it.

Q21:	What are the criteria for who can purchase INSITE™ MR-HD Automotive Pro license ?
A21:	Once the interested party completes the Cummins® Virtual College INSITE™ electronic service tool training, they can register and purchase the subscription for INSITE™ electronic service tool.
Q22:	What can an interested party do with INSITE™ MR-HD Automotive Pro license ?
A22:	An interested party can do everything a distributor or dealer can do with INSITE™ MR-HD Automotive Pro, except independently load unauthorized ECM calibration or uprate/derate engines. This is controlled through the sale of fleet counts, which are not part of Service Information Regulation (SIR).
Q23:	As a distributor or dealer, do I have to provide for sale ECM calibration files to any interested party?
A23:	Yes, but only the EPA approved ECM calibration with which the engine was built and certified, or an approved revision/update of that ECM calibration.
Q24:	Do I have to provide for sale fleet counts to any interested party?
A24:	No. Fleet counts should only be sold to interested parties when an ECM calibration is required to complete an emissions related repair, or Cummins Inc. directed repair. The distributor will have to evaluate the circumstances based on a case-by-case basis to ensure that Fleet Counts are not being abused by customers. A specific instance where a Fleet Count would be provided to an interested party would be as a result of a repair requiring a Fleet Count only identified in a Service Publication, i.e. Service Bulletin, Installation Instruction or Technical Service Bulletin.
Q25:	Do I have to provide for sale Zap-it to any interested party?

A25:	Yes, Zap-Its should only be sold to an interested party when it can be verified that the customer approves the password removal to complete the repair. ECM passwords being enabled prevents a user from making changes that they would normally have with the INSITE™ Basic functionality. In the event that a password is not relayed during an engine sale, the new owner would not have the ability to adjust settings per their requirements. The distributor will have to evaluate the circumstances based on a case-by-case basis to ensure that Zap-Its are not being abused by customers.
Q26:	Will ECM calibration files be available on QuickServe® Online to the Service Information Regulation (SIR) users?
A26:	Not at this time.
Q27:	Will the INCAL™ DVD contain all ECM calibration files?
A27:	INCAL™ DVD, PN: 4358618, contains 2013 and later automotive on highway ECM calibration files.
Q28:	How will a purchaser know where to register his INSITE™ electronic service tool subscription?
A28:	A list of distributors is included in the INSITE™ electronic service tool/CVC kit.
Q29:	Where can customers find INSITE™ electronic service tool help files and Fault Information System (FIS) files?
A29:	INSITE™ electronic service tool help files and FIS files are delivered with the INSITE™ electronic service tool and the latest updated files are available at http://care.cummins.com .
Q30:	What is CODE?

A30:	CODE is Cummins Inc. Open Diagnostic Exchange. CODE satisfies the Service Information Regulation (SIR) requirement to provide datastream and test information to an interested electronic tool manufacturer. The interface provided enables an interested tool company to build a diagnostic tool that interfaces with a Cummins Inc. engine.
Q31:	If a tool manufacturer contacts the distributor to provide information on building non-Cummins Inc. electronic tools, what should the distributor do?
A31:	Direct the manufacturer to QuickServe® Online. In the products tab, there is a "Cummins Inc. Open Diagnostic Exchange" link. Clicking this link provides more information on the purchasing process.
Q32:	How can we protect engines from unauthorized horsepower uprates or parameter change?
A32:	Customers should be encouraged to use ECM Passwords.
Mechanical Tool	
Q33:	Are mechanical tools affected by Service Information Regulation (SIR)?
A33:	Yes, any tool used for repairs, servicing, or maintenance of any emission-related component is in scope of Service Information Regulation (SIR).
Q34:	Is a distributor required to provide mechanical tools for sale to any interested party?
A34:	Yes, if a distributor uses the tool to perform any emission related work.
Training	
Q35:	Is a distributor required to allow any interested party to attend classroom product training?
A35:	Yes.
Q36:	Is a distributor location required to offer hands-on qualification to any interested party?

A36:	Distributor locations are not required to offer hands-on qualification to interested parties. Interested parties can participate in the class, but are excluded from the hands-on testing process. Completion of the class will result in a “trained” certification instead of a “qualified” certification. Completion of training is not authorization to submit warranty claims.
Q37:	Is there a specific class for interested parties?
A37:	Interested parties on Service Information Regulation (SIR) affected products attend the same classes as distributor or dealer technicians.
Q38:	What fees can I charge for the pricing of classroom training?
A38:	Fair, reasonable, and non-discriminatory pricing would apply. Pricing is expected to be in line with the cost for customers or dealers.
Q39:	Are prerequisites still required for an interested party to attend classroom training?
A39:	Yes. Classroom training has been designed as a supplement to the self-study prerequisite training.
Warranty	
Q40:	Can an interested party perform warranty related repairs?
A40:	Only certified Cummins Inc. service providers can complete warranty repairs and/or submit warranty claims. Service Information Regulation (SIR) has no impact on the ability to submit warranty claims.
Trade Regulation	
Q41:	Are there any countries restricted from sale of service information?

Trade Regulation	
A41:	International laws and Cummins Inc. Export Control Policy (CORP-00-04-00-00) prohibit or severely restrict sales, service, and transfer of technical or service information to the following countries: Cuba, Iran, North Korea, Syria, The Republic of South Sudan (South Sudan), The Republic of Sudan (North Sudan), and Myanmar (Burma).
Q42:	Are there any interested parties restricted from sales of service information?
A42:	International Law and Cummins Inc. Export Control Policy also regulates sales, service, and transfer of technical or service information to certain interested parties. If the sale, service, or transfer of technical or service information is for a restricted end use (e.g., military, nuclear) there may be restrictions. Contact the Cummins Inc. law department and/or the Global Trade Compliance Team at ExportCompliance@cummins or Law Department@Cummins.
Q43:	Where do I go to for assistance on Export Control/Trade Regulation issues?
A43:	Due to the complexity of laws regarding export controls and trade, if you encounter any question that needs further confirmation or consultation, or you believe you need additional training or information, contact the Cummins Inc. law department and/or the Global Trade Compliance Team at ExportCompliance@cummins or Law Department@Cummins.
