

Fault Code: 529

Solenoid B Error

 Printable Version

Overview

Codes	Reason	Effect
Fault Code: 529 PID(P): S51 SPN: 703 FMI: 3 Lamp: Yellow SRT:	The dual output B signal pin 9 of the OEM interface harness indicates an open or short circuit.	OEM-dependent.

Solenoid B Circuit

Circuit Description

The solenoid driver will control engine and vehicle functions by closing or opening a switched solenoid output, based on 11 selected engine parameters. The solenoid output will control functions such as a fan clutch, intake grid heater, air cleaner restriction indicator, or an oil filter differential pressure indicator.

Component Location

The solenoid driver is an OEM device and the location of the solenoid is dependent upon the OEM.
