General Information

Alternator

The 2002 ISM engine has a new pad-mount alternator option.

The basic heavy-duty electrical system consists of:

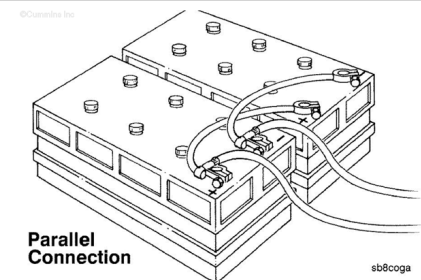

- Batteries (1) (usually three or four connected in parallel)
- A starting motor (2)
- An alternator (3)
- A magnetic switch (4)
- An ignition switch (5)
- A push-button switch (6)
- All necessary wiring.

All components **must** be carefully matched.

The accompanying illustrations show typical parallel and series battery connections:

- Parallel connection.

- Series connection.
