General Information

Rocker Lever Covers

The QSK23 rocker lever covers are made of cast aluminum and utilize re-usable o-ring type valve cover gaskets.

Injector Levers

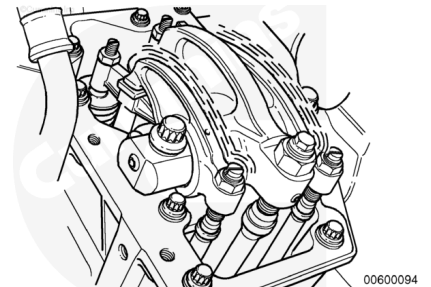

The QSK23 injector levers are made from forged steel.

Rocker Levers

Each QSK23 rocker lever is a single piece, solid design with a precision-ground nose radius.

Rocker Lever Shaft

The QSK23 uses a large 45 mm [1.77 in] rocker lever shaft diameter due to high injector train loads.

The valves and injectors are adjusted using the outer base circle (OBC) feeler gauge, or screwdriver method.
