Replacement Information - Fuel Transfer Pump Assemblies

## Replacement Information - Fuel Transfer Pump Assemblies

### Warranty Statement

The information in this document has no effect on present warranty coverage or repair practices, nor does it authorize TRP or Campaign actions.

### Contents

This Technical Service Bulletin provides information on how to replace an obsolete ISX transfer pump with no superseding part number available.

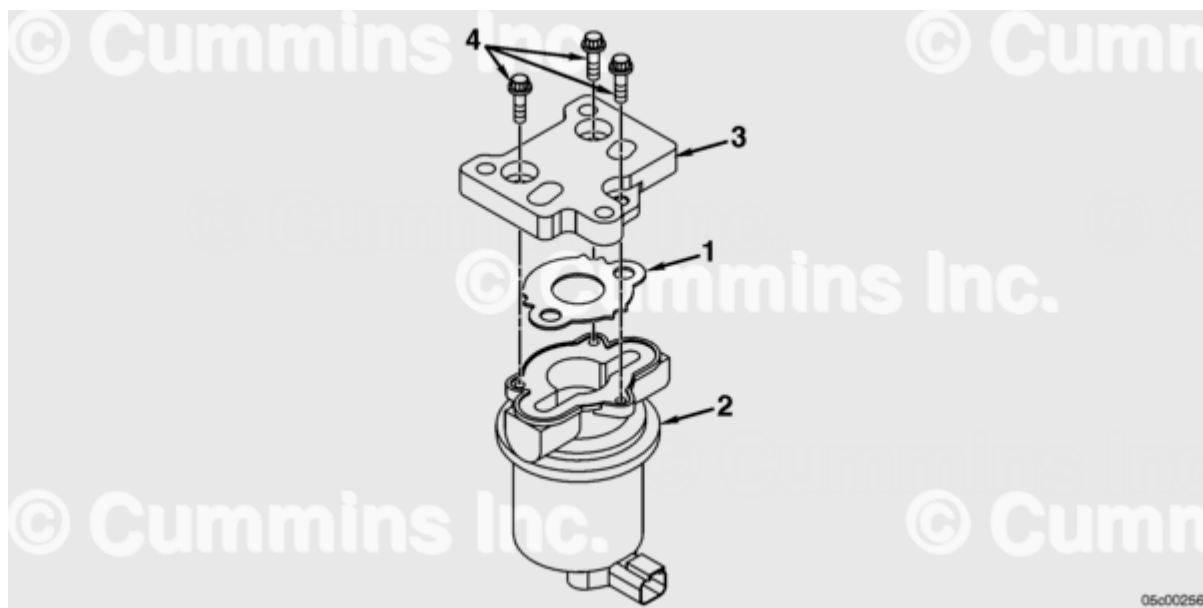

Figure 1, Fuel Transfer Pump Assembly -(1) Gasket, (2) Fuel Transfer Pump, (3) Mounting Support, 4) Capscrew

ISX transfer pump assemblies consist of a fuel transfer pump and a mounting support. See Figure 1.

Fuel Transfer Pump, Part Number 3964381, has been superseded by Part Number 4935013. The fuel transfer pump is **not** available for purchase alone, but it is used in many transfer pump assemblies. The major difference in the assemblies is the mounting support. When an obsolete

ISX transfer pump with no superseding part number is encountered, the correct replacement part number can be determined by reading the number on the transfer pump mounting support. Use the table to determine the correct fuel transfer pump assembly part number.

The mounting support design can vary from the one shown in Figure 1.

| Support Part Number | New Transfer Assembly Pump Part Number |
|---------------------|----------------------------------------|
| 3964387             | 4935005                                |
| 4088506             | 4935092                                |
| 4076510             | 4935094                                |
| 4062399             | 4935096*                               |
| 4062399             | 4935098                                |

**Note :** Sold only as a part of Transfer Kit Part Number 4025099 with timer module.
