Specifications

⚠ CAUTION ⚠

Engine intake air must be filtered to prevent dirt and debris from entering the engine. If air intake piping is damaged or loose, unfiltered air will enter the engine and cause premature wear.

Industrial and Generator Drive

Maximum Temperature Rise between Ambient Air and Engine Air Inlet (ambient above 0°C [32°F])

Industrial 17°C [30°F]

Maximum Inlet Restriction (clean filter) Normal-Duty Element:

Industrial 250 mm H₂O [10 in H₂O] Power Generation 381 mm H₂O [15 in H₂O]

Maximum Inlet Restriction (dirty filter)	635 mm H ₂ O [25 in H ₂ O]
--	--

Maximum Allowable Pressure Drop across Charge Air Cooler:

Industrial

psi 14 kPa [2 psi] Hg (mercury) 102 mm Hg [4 in Hg]

Maximum Allowable Pressure Drop from Turbocharger Outlet to Intake Manifold:

Power Generation:

psi 14 kPa [2 psi] Hg (mercury) 102 mm Hg [4 in Hg]

Four-Step Wastegate Controller Solenoid Resistance	7 to 8 ohms
