Cylinder Block

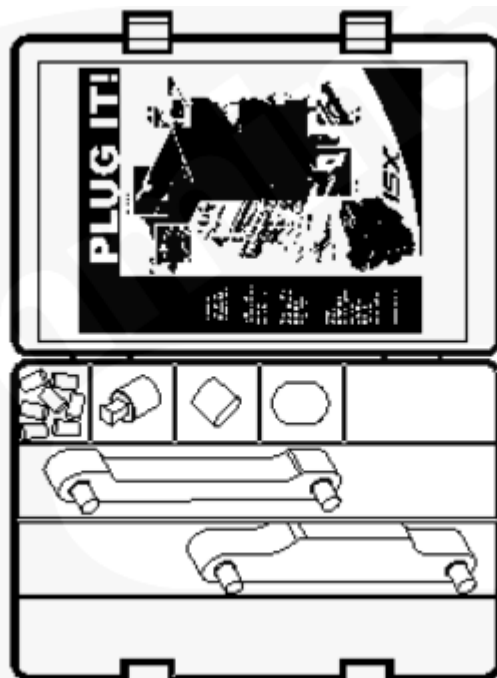

Tool Number

4918319

Protective Plug Kit

Used to plug oil passages and drillings during a repair process.

©Cummins Inc

22c00256

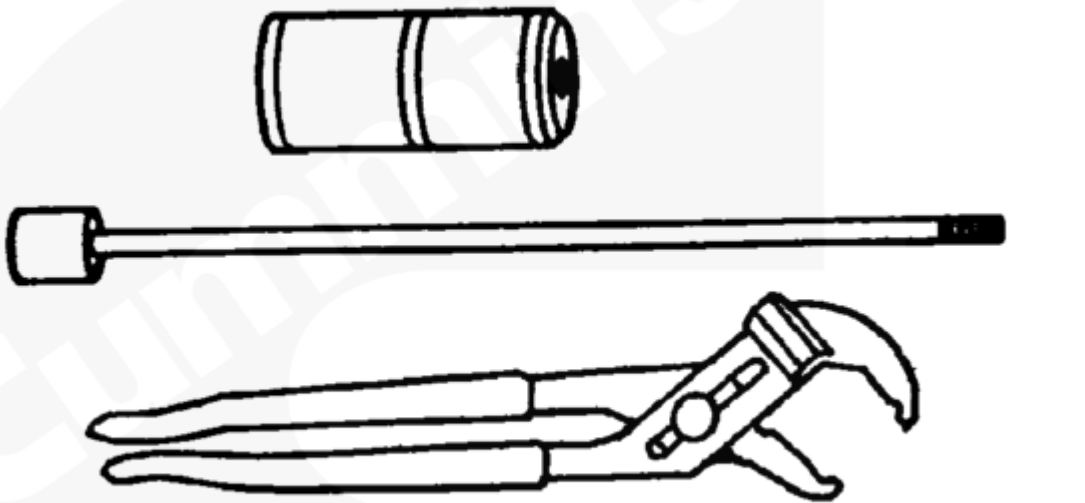

Tool Number

ST 1178

Main Bearing Cap Puller

Used to remove the main bearing caps from the cylinder block.

©Cummins Inc

mb8toga

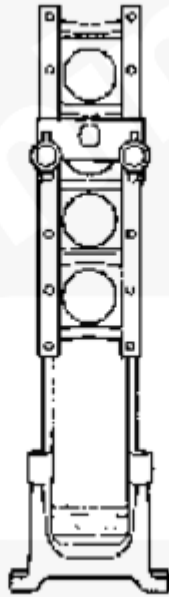

Tool Number

ST 561

Connecting Rod Checking Fixture

Used with Guide Kit, Part Number 4918339, to inspect the connecting rods for bend, twist, and length.

©Cummins Inc

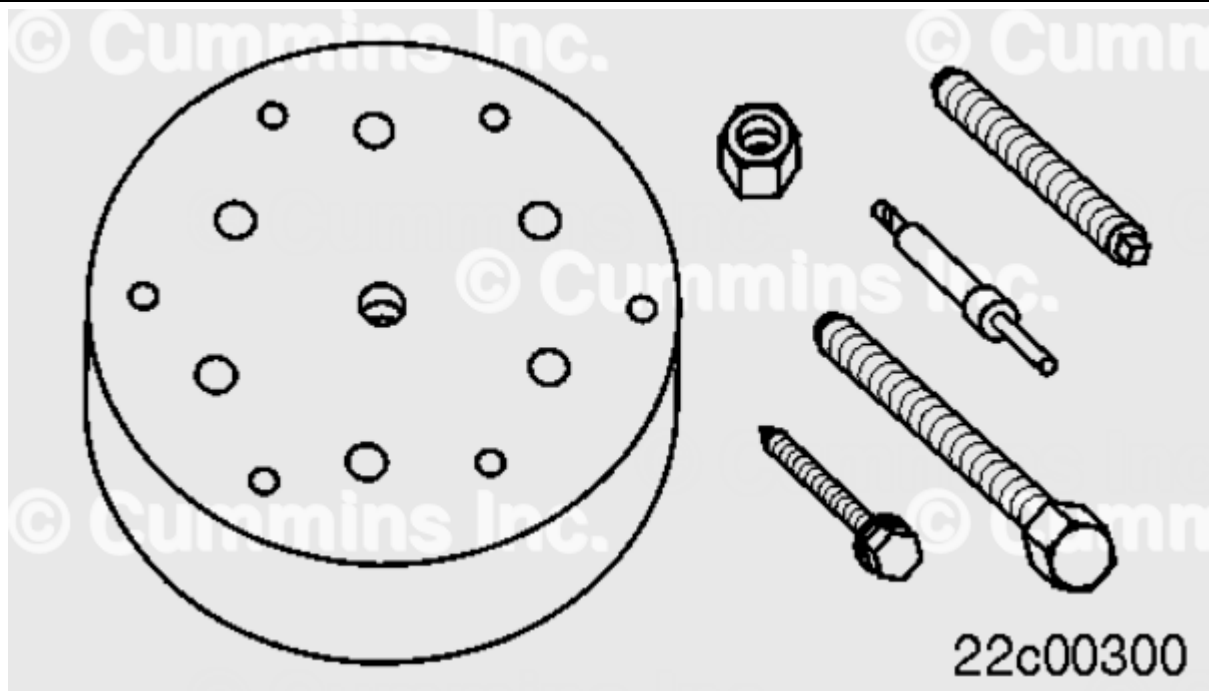

01600273

Tool Number

3164780

Oil Seal Puller/Installer

Used to pull or install the rear crankshaft seal on both the REPTO and Non REPTO applications. The previous kits 3162994 and 3164153 can be updated to work on REPTO applications by adding the replacer plate, Part Number 3164763.

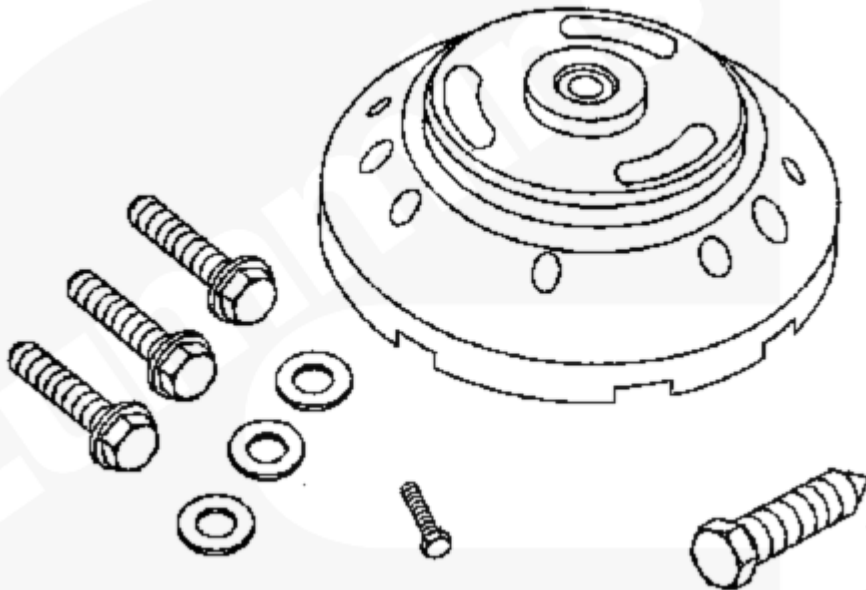

Tool Number

3162992

Oil Seal Puller/Installer

Used to pull or install the front crankshaft seal.

©Cummins Inc

3162992

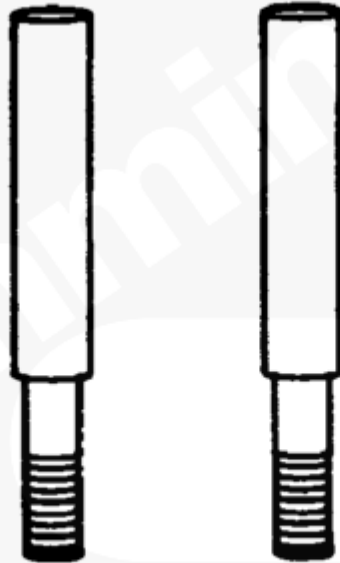

Tool Number

3163097

Connecting Rod Guide Pins (Two)

Used to protect the crankshaft journal by guiding the connecting rod during installation or removal.

cx8togg

Tool Number

3163745

Universal Cylinder Liner Puller

Used to remove the cylinder liners from all present engine series. Used with cylinder liner puller plate, Part Number 3162462, on Signature engines. Cylinder liner remover, Part Number 3162873, can also be used for this application.

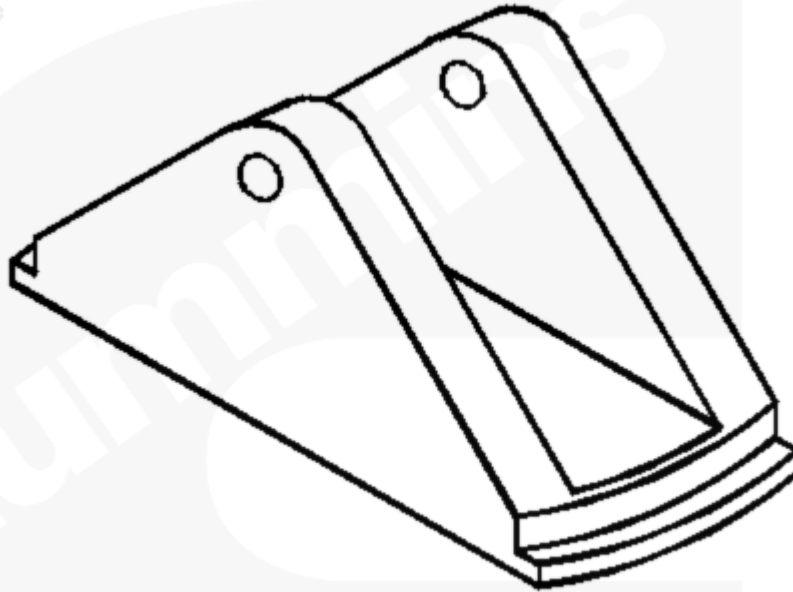

Tool Number

3162462

Cylinder Liner Puller Plate

Used with the universal cylinder liner puller, Part Number 3162873, to remove the cylinder liners.

©Cummins Inc

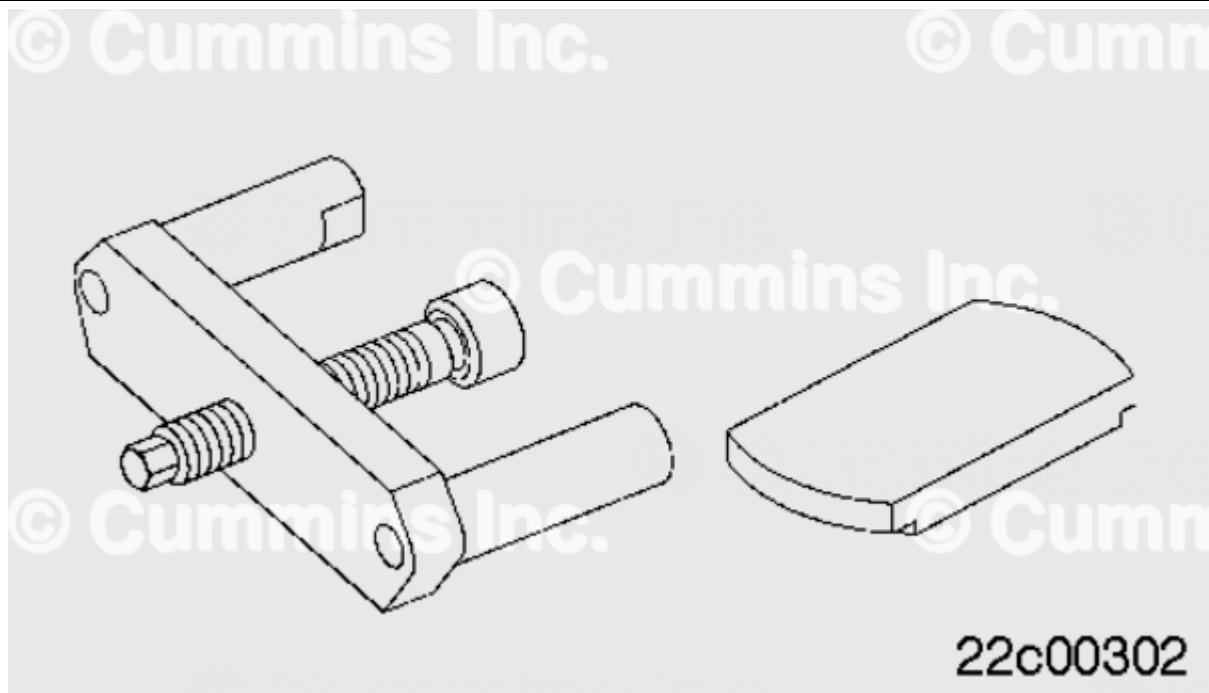

3162462

Tool Number

3164606

Cylinder Liner Installation Tool

Used to install cylinder liners and clamp for protrusion readings into the cylinder block. Cylinder liner installation tool, Part Number 3162461 can be also used for this application, if updated with the cylinder liner installation plate, Part Number 3164606.

Tool Number

3824510

Safety Solvent

Used to clean machine surfaces prior to the installation of thread repair inserts, coolant passage surfaces, and upper deck repair sleeves.

©Cummins Inc

oi8isea

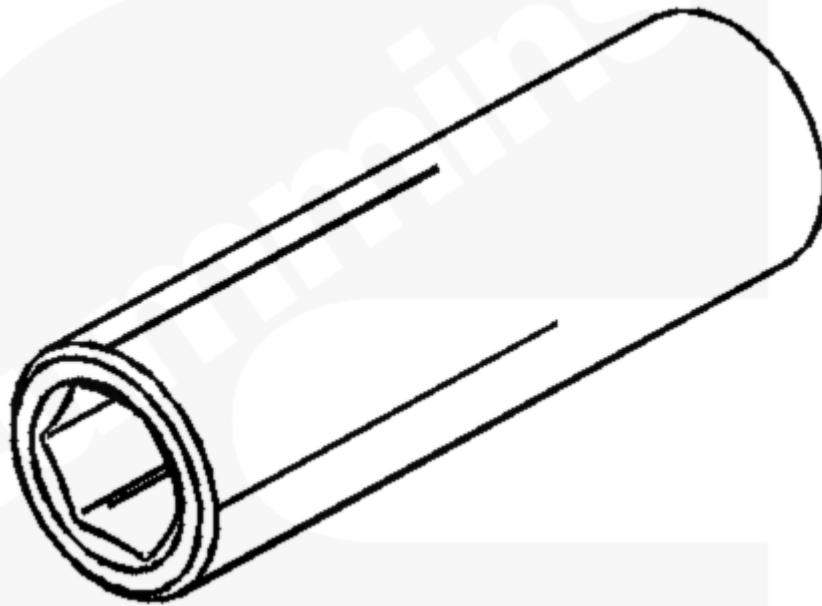

Tool Number

5573072

Marked Socket

Used to tighten the main bearing capscrews and cylinder head capscrews. Part Number 3163059 is a 3/4 inch impact wrench with ample range to tighten bolts.

©Cummins Inc

3163484

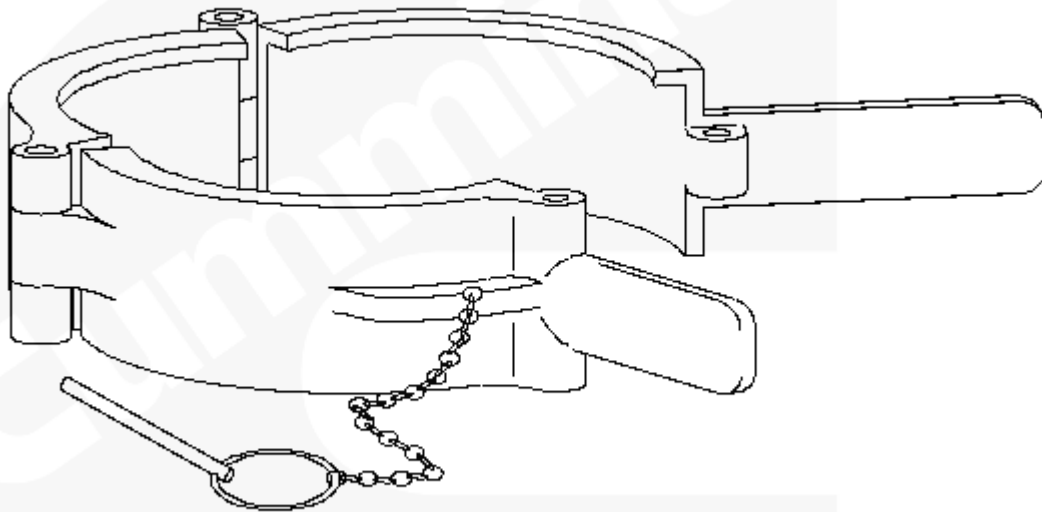

Tool Number

3164846

Piston Ring Compressor

Used to install piston into cylinder block. The piston ring compressor, Part Number 3163158, can also be used, if machined to work with flat top cylinder liners.

©Cummins Inc

3163158

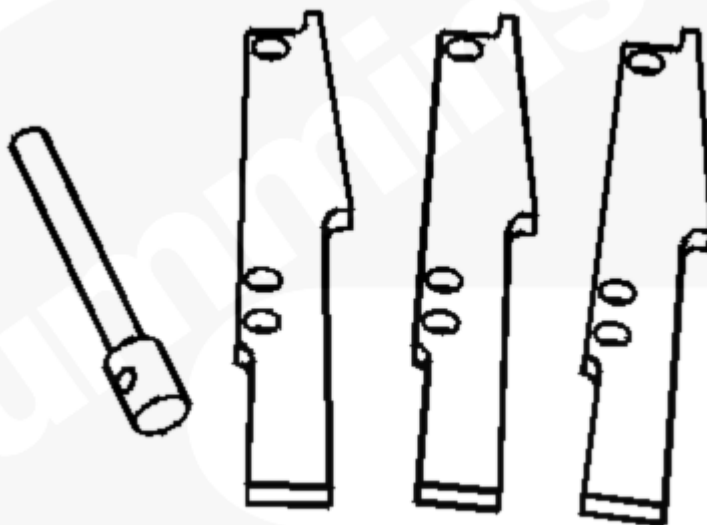

Tool Number

3163021

Timing Pin and Wedges Kit

Kit contains a pin and three wedges. Used to set engine base timing.

©Cummins Inc

3163021

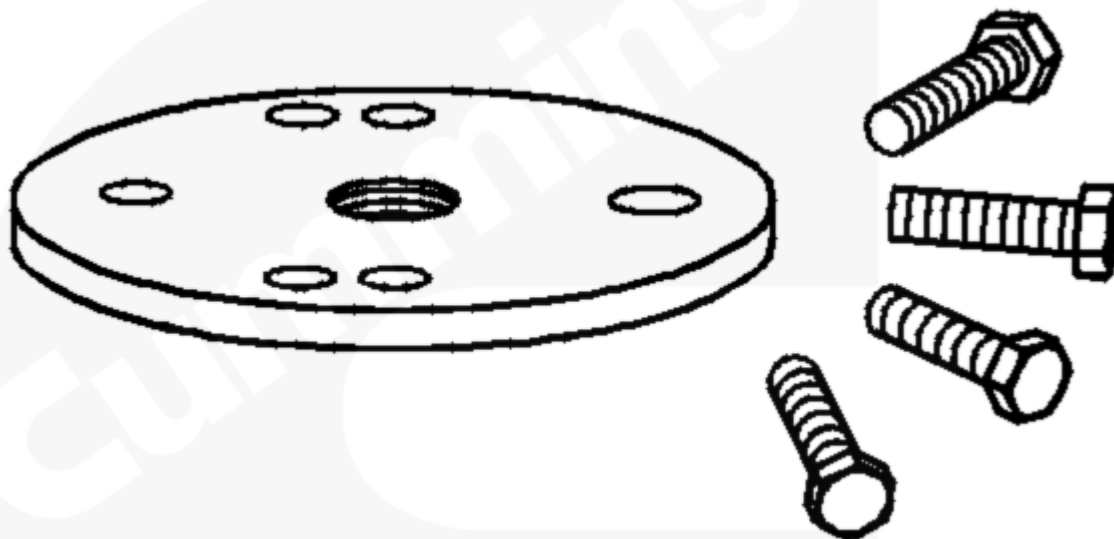

Tool Number

3163069

Injector Cam and Valve Gear Puller

Used to pull the cam gear. The puller will only work on camshaft gears with puller holes.

©Cummins Inc

3163069

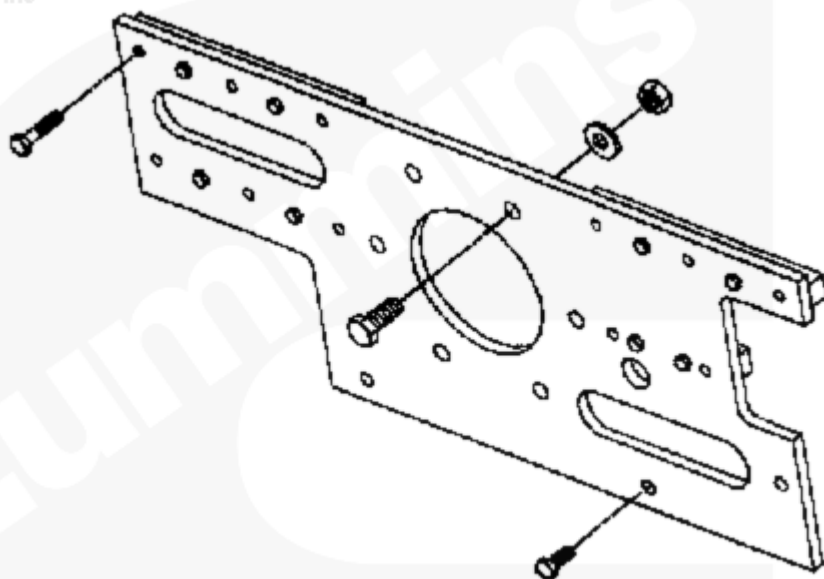

Tool Number

3162464

Mounting Plate

Used with either Part Number 3375193 or Part Number 3375194 engine stand.

©Cummins Inc

3162464

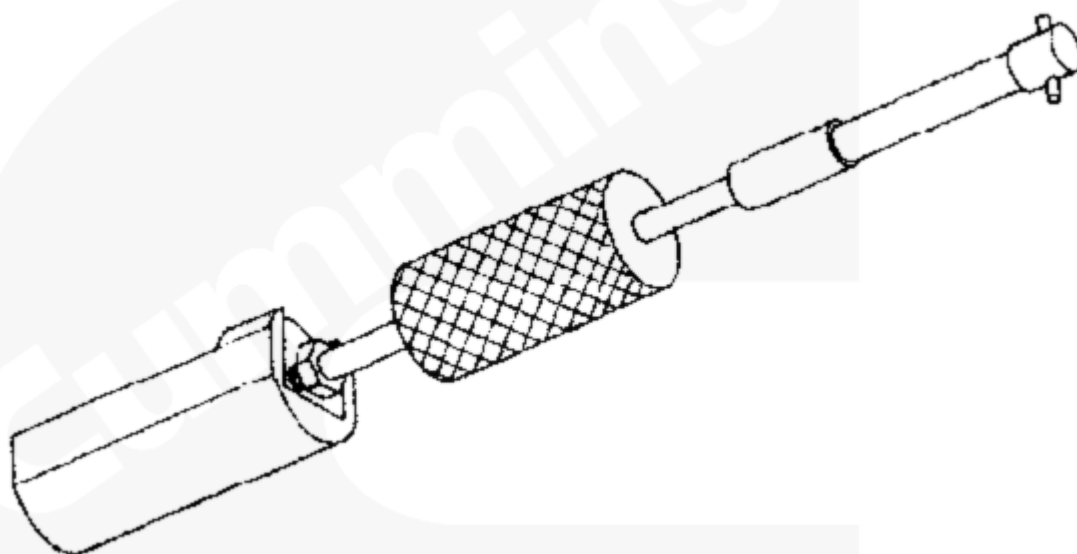

Tool Number

3163483

Injector Installation and Removal Tool

Used to remove and install injectors.

©Cummins Inc

3163483

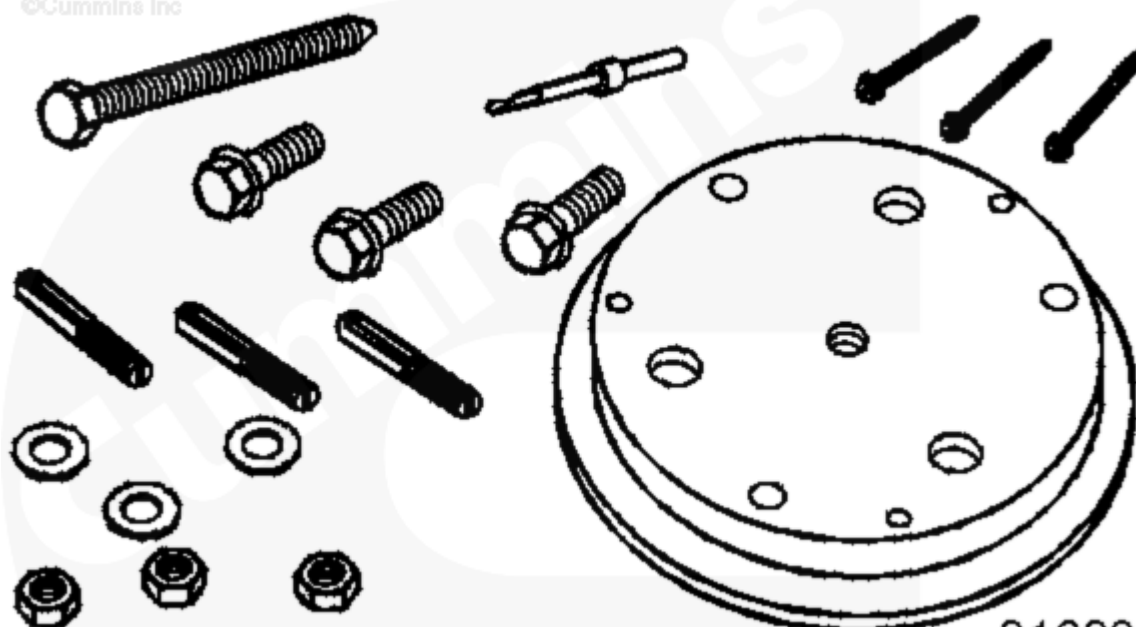

Tool Number

3163826

Thick Wear Sleeve/Wet Flywheel Housing Oil Seal Installation and Removal Tool

Used to remove and install the wear sleeve and wet flywheel housing oil seal on QSX15 engines.

©Cummins Inc

3163826

Tool Number

4918530

Crankshaft Adapter and Gear Removal Kit

Used to remove and install the crankshaft adapter and crankshaft gear.

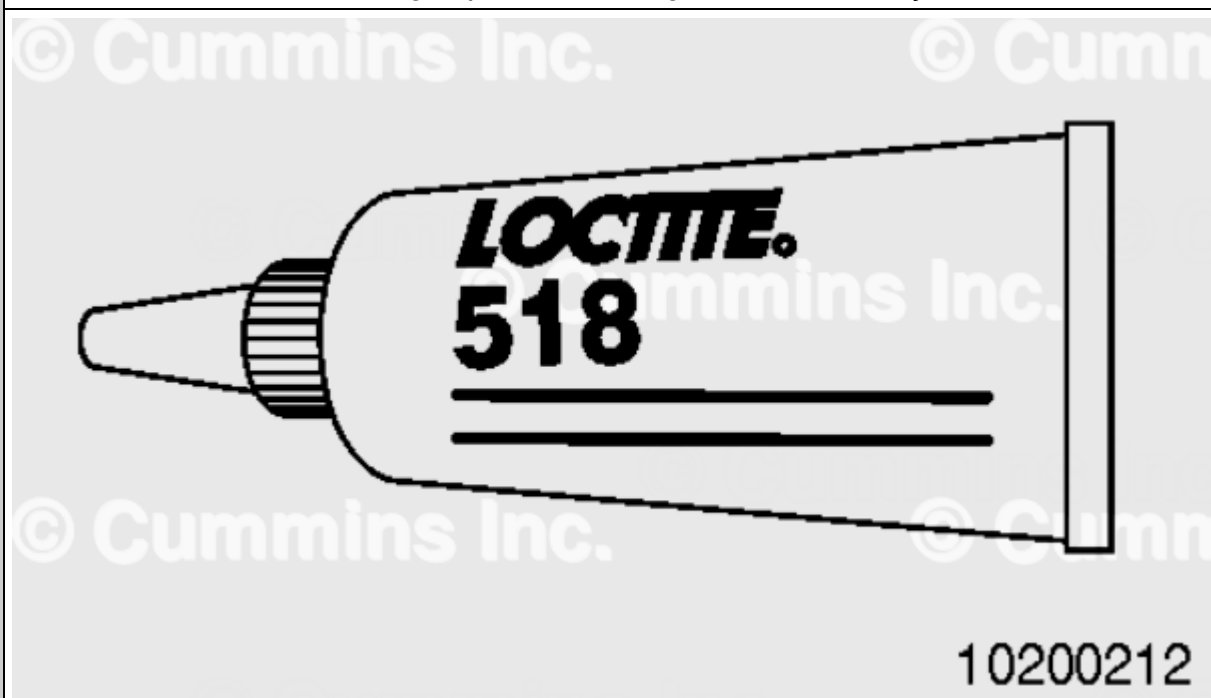

Tool Number

4918675

Loctite™ 518 Flexible Anaerobic Gasket Sealant (Color Red)

Used to seal the main bearing cap to the mating surface of the cylinder block.

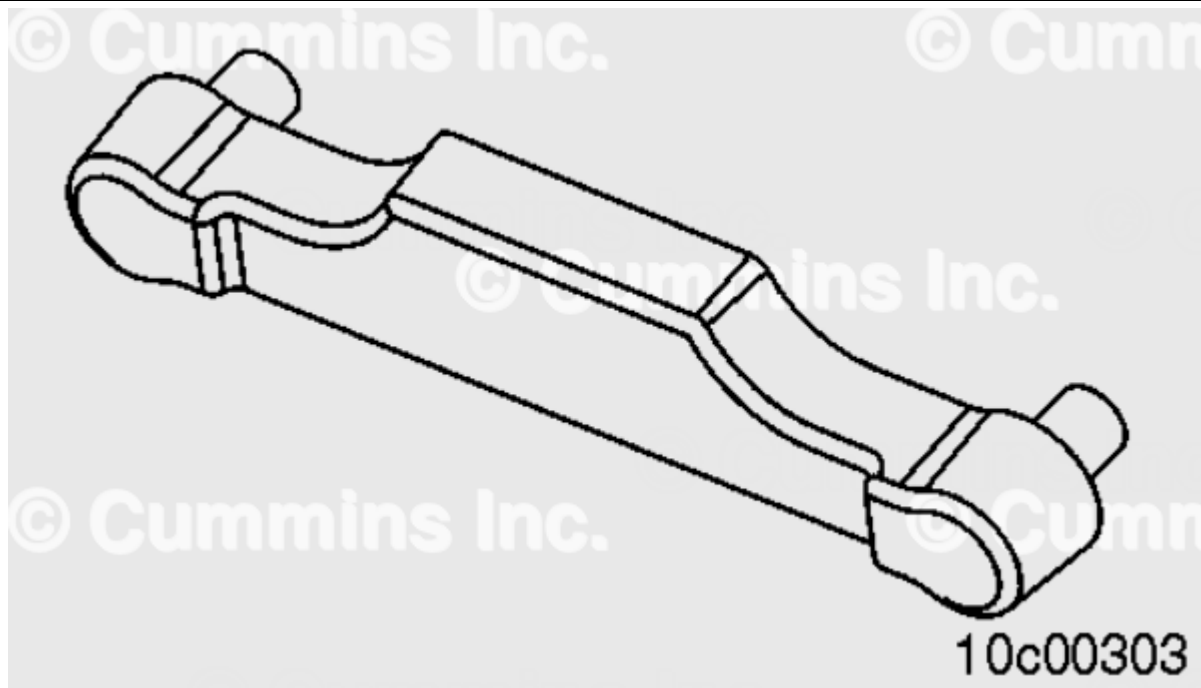

Tool Number

4918874

Protective Plug

Used to plug the front oil passage of the cylinder block during a repair process. For use on engines built after August 2006.

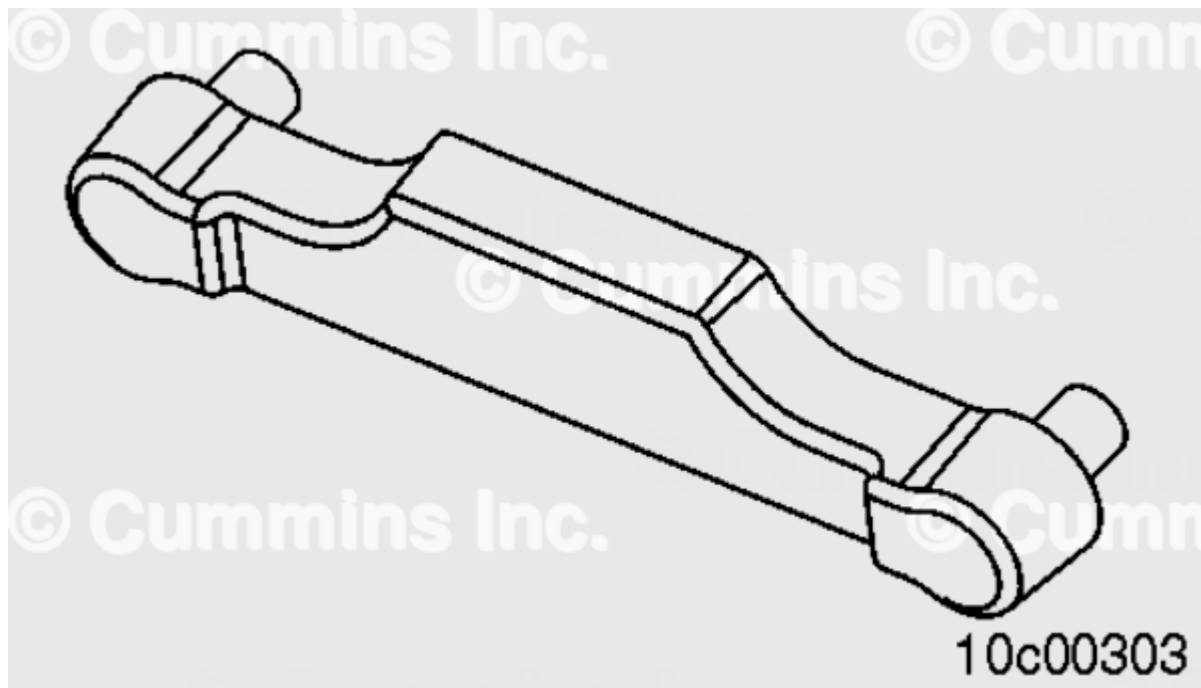

Tool Number

4918875

Protective Plug

Used to plug the rear oil passage of the cylinder block during a repair process. For use on engines built after August 2006.

Tool Number

3164021

Thread Salvage Kit

Used to salvage/repair damaged cylinder head capscrew threads in the cylinder block.

Tool Number

3163842

Regular Hexagon Jam Nut

Used to salvage/repair damaged cylinder head capscrew threads in the cylinder block. Used with Part Number 3164021 Thread Salvage Kit.

Tool Number

3164445

Threaded Insert [50mm]

Used to salvage/repair damaged cylinder head capscrew threads in the cylinder block. Used with Part Number 3164021 Thread Salvage Kit.

Tool Number

3163717

Threaded Insert [76mm]

Used to salvage/repair damaged cylinder head capscrew threads in the cylinder block. Used with Part Number 3164021 Thread Salvage Kit.

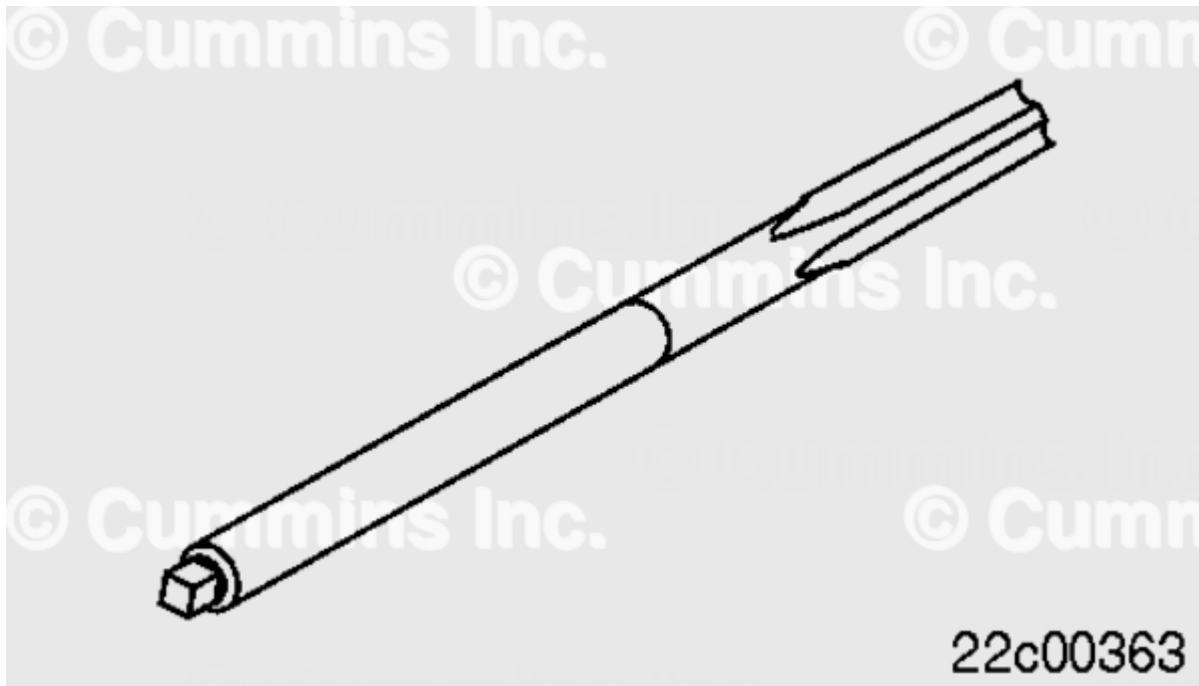

Tool Number

3163899

Reamer

Used to salvage/repair damaged cylinder head capscrew threads in the cylinder block. Used with Part Number 3164021 Thread Salvage Kit.

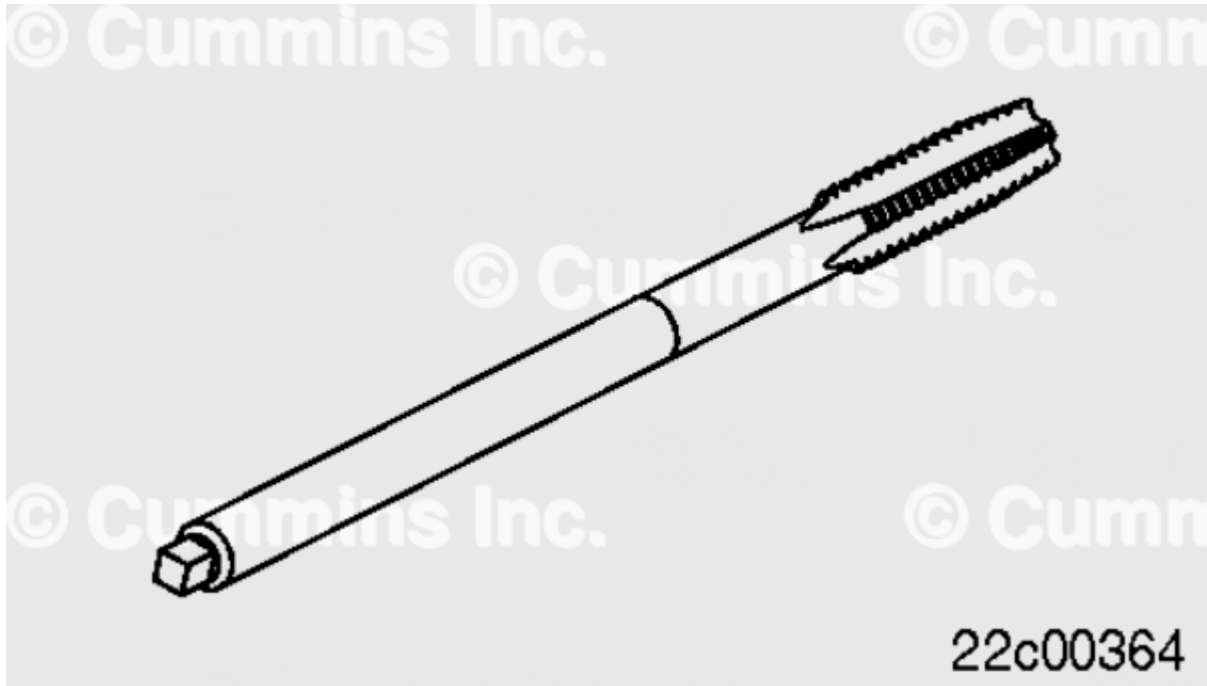

Tool Number

3163901

Tap

Used to salvage/repair damaged cylinder head capscrew threads in the cylinder block. Used with Part Number 3164021 Thread Salvage Kit.

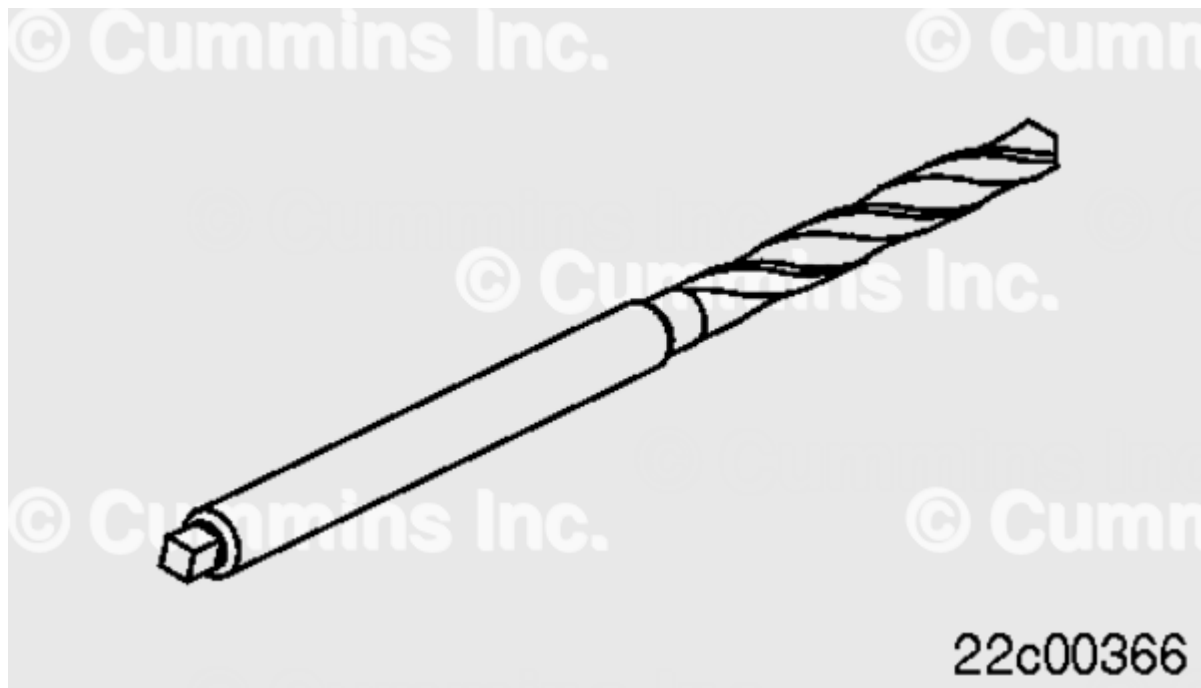

Tool Number

3164335

Drill

Used to salvage/repair damaged cylinder head capscrew threads in the cylinder block. Used with Part Number 3164021 Thread Salvage Kit.

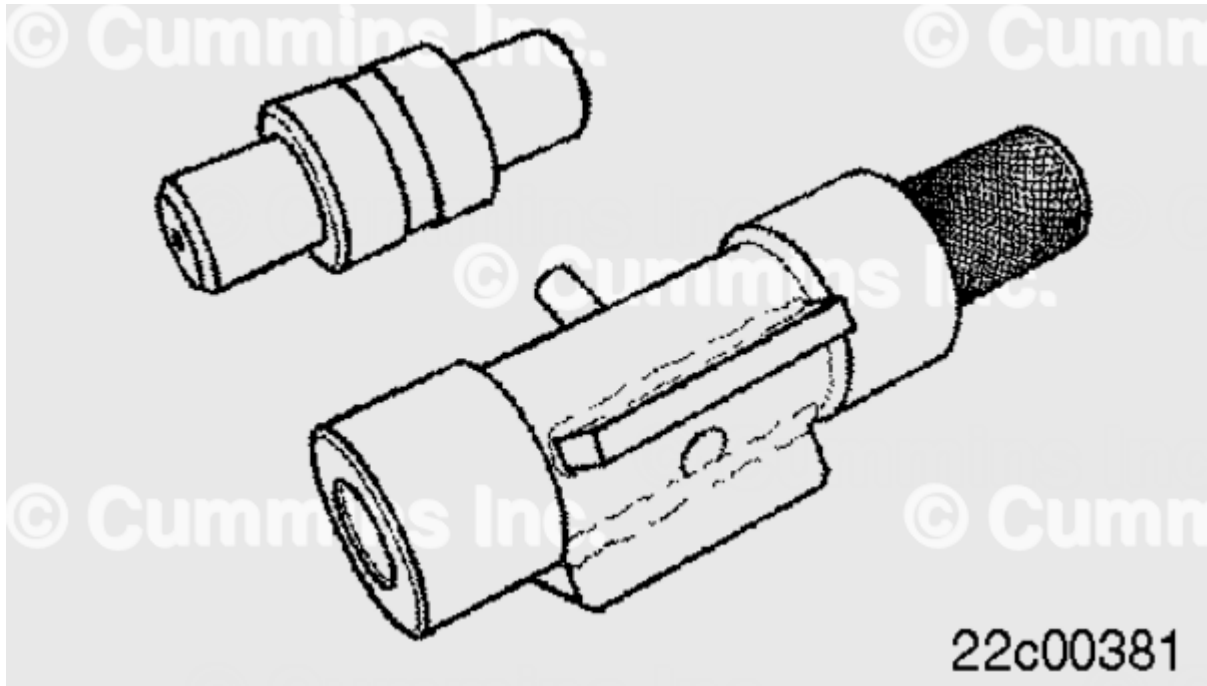

Tool Number

4918339

Connecting Rod Checking Guide

Use with ST 561 Connecting Rod Checking Fixture to measure stretch and twist in the connecting rod.

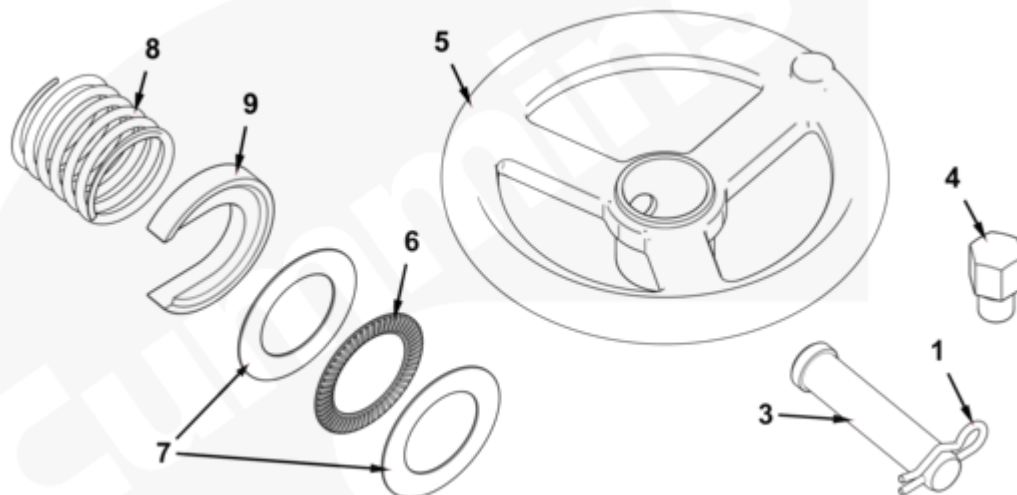

Tool Number

5395552

Counterbore Cutting Improvement Kit

The kit provides several options to make the cylinder block counterbore cutting operation easier when the engine is in the vehicle. The kit is used with the Counterbore cutter driver, Part Number 3163785 and any engine-specific counterbore cutter kit that uses Part Number 3163785.
