Fuel System

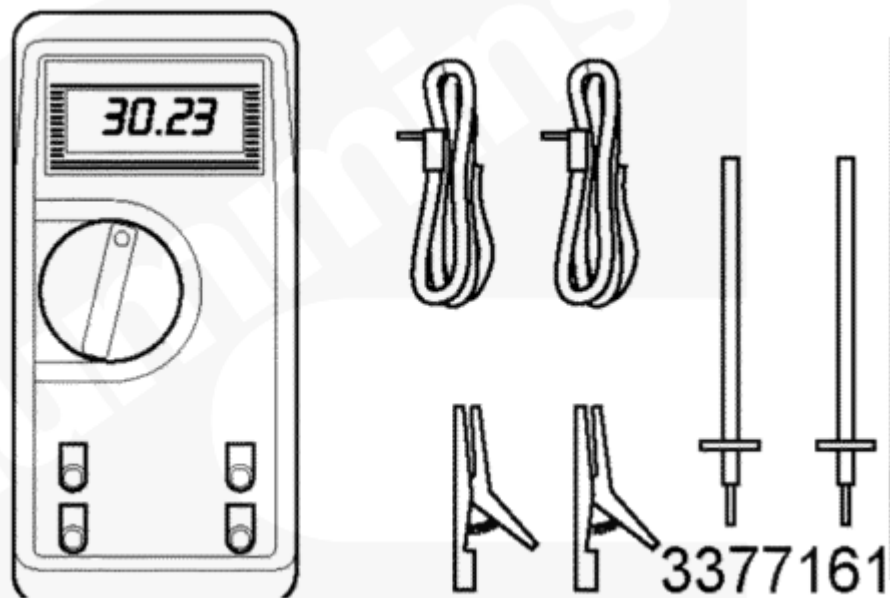

Tool Number

3164488

Multimeter

Used to measure voltage, resistance, and current in electrical circuits.

©Cummins Inc

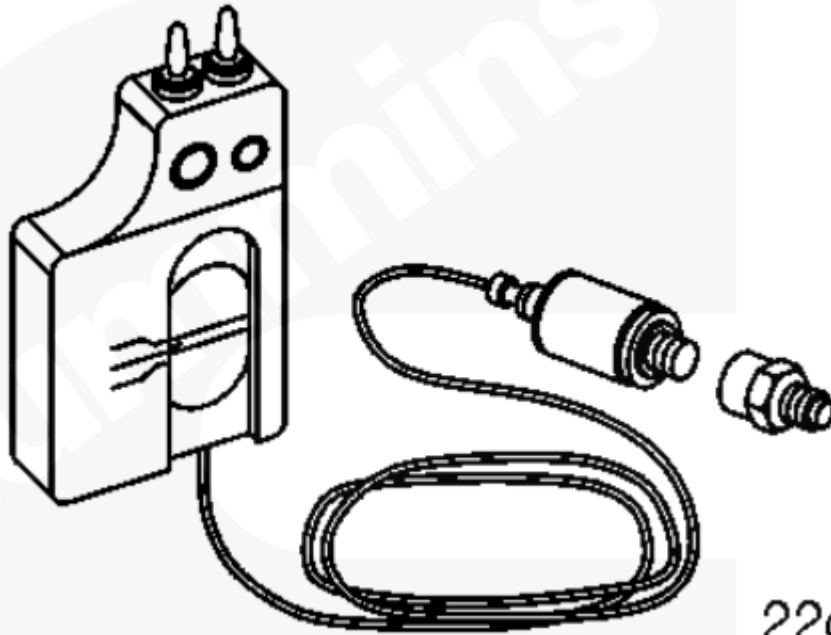

Tool Number

3164491

Pressure and Vacuum Module

Used with multimeter, Part Number 3164488, to measure pressures and restriction in the fuel system.

©Cummins Inc

22c00252

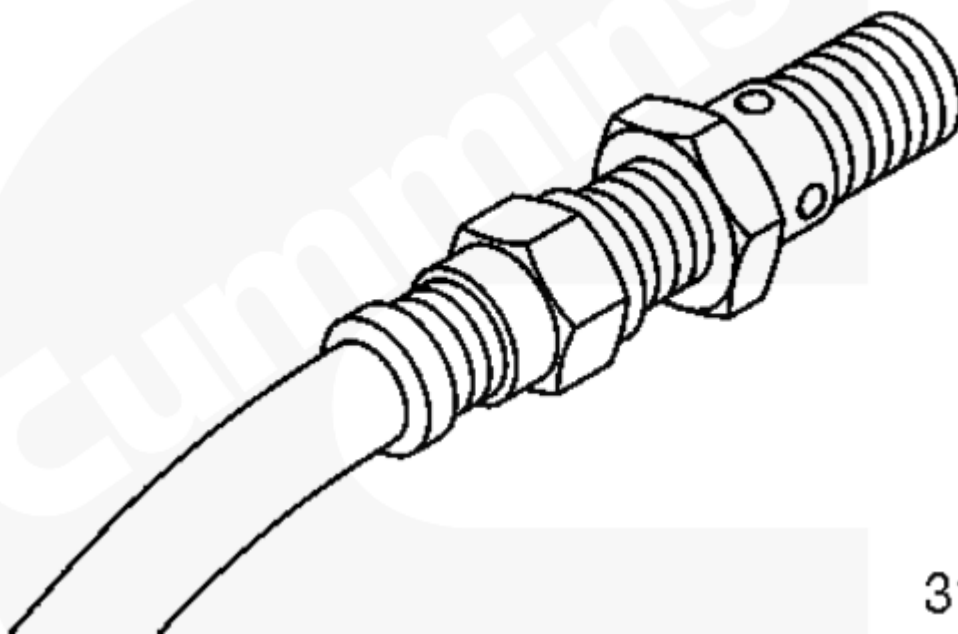

Tool Number

3164618

12 mm Banjo Adapter Fitting (Leakage-Flow Adapter)

Used to isolate drain flow from the fuel drain lines where they connect to the fuel drain manifold. Allows fuel leakage measurement from the fuel pump, injector, or fuel rail pressure relief valve drain lines.

©Cummins Inc

3164614

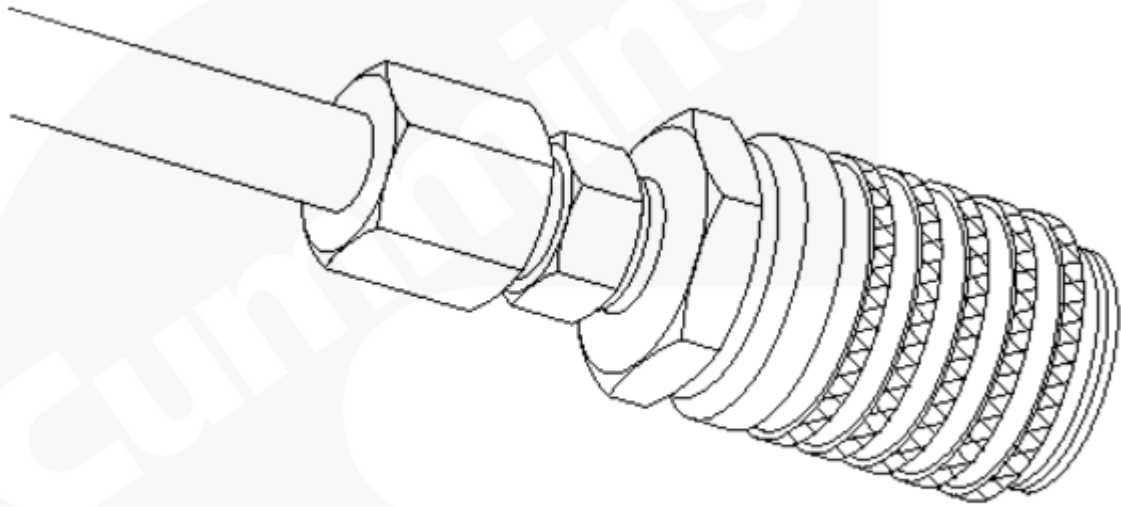

Tool Number

3164621

0.043 Inch Diagnostic Fuel Line

Used to create rated fuel flows through the low-pressure fuel system without loading the engine.

©Cummins Inc

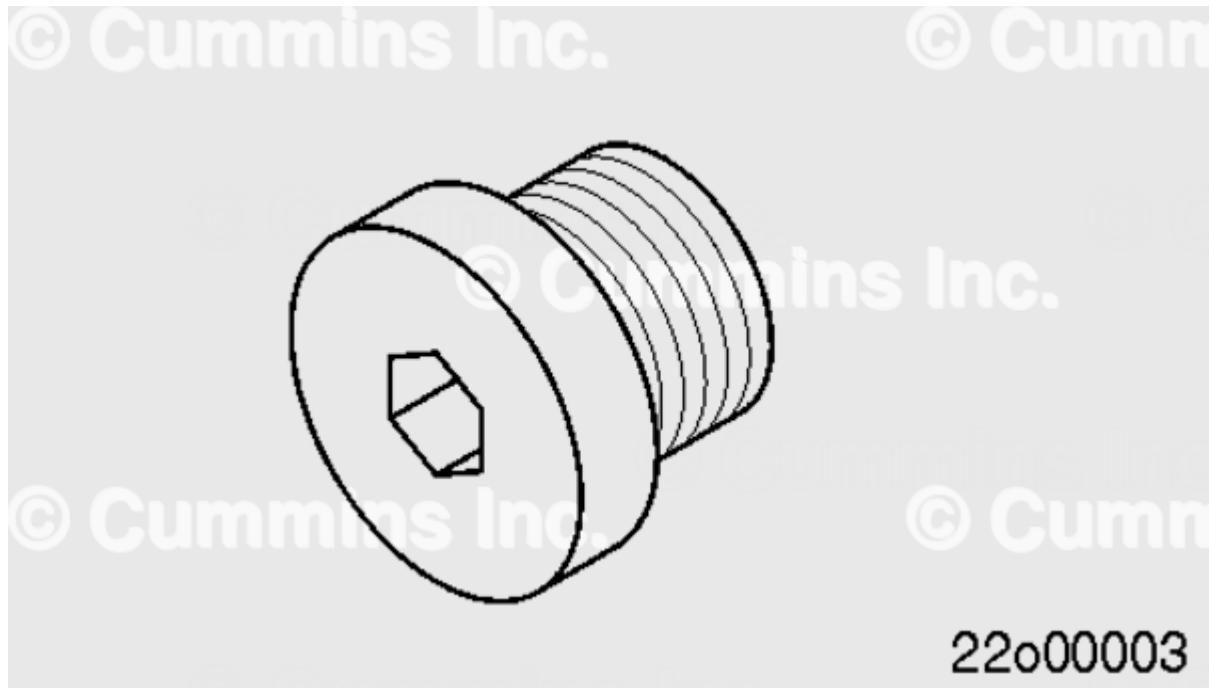

22c00253

Tool Number

3678921

12 mm Straight Thread O-Ring Plug (STOR) Fitting

Used to plug the port on the fuel filter head when the air bleed transfer tube is removed for measuring high-pressure fuel pump return flow.

**Tool Number**

3824510

Electrical Contact Cleaner

Used to clean electrical connections and fuel pump internal parts.

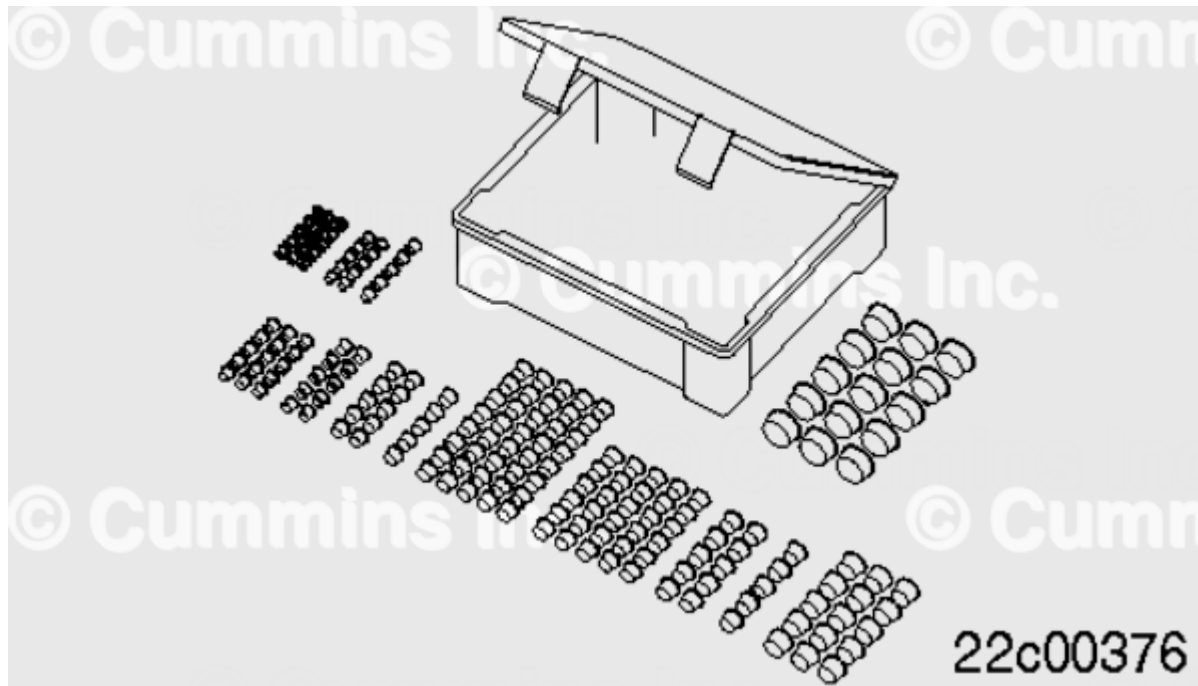

Tool Number

4919073

Fuel System Clean Care Kit

Used to cap or plug the fuel system fittings during service to prevent debris from entering the fuel system.

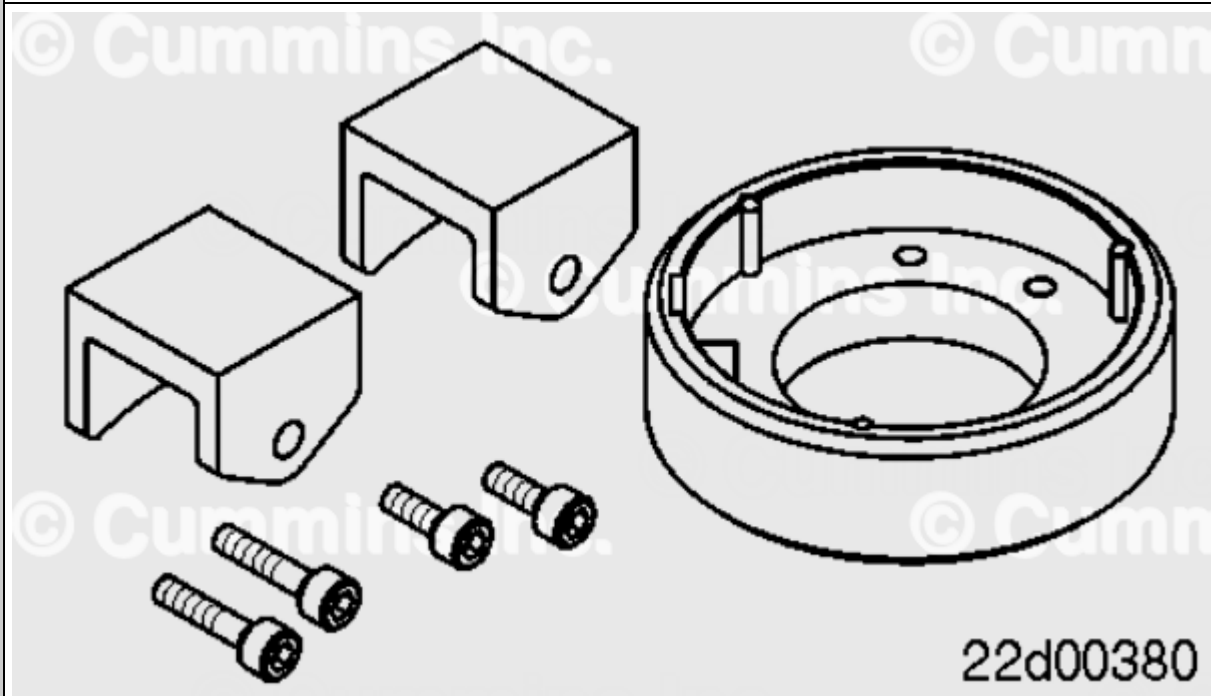

Tool Number

4919586

Fuel Pump Gear Replacer Kit

Used with gear puller ST-647 to remove and install the fuel pump gear.

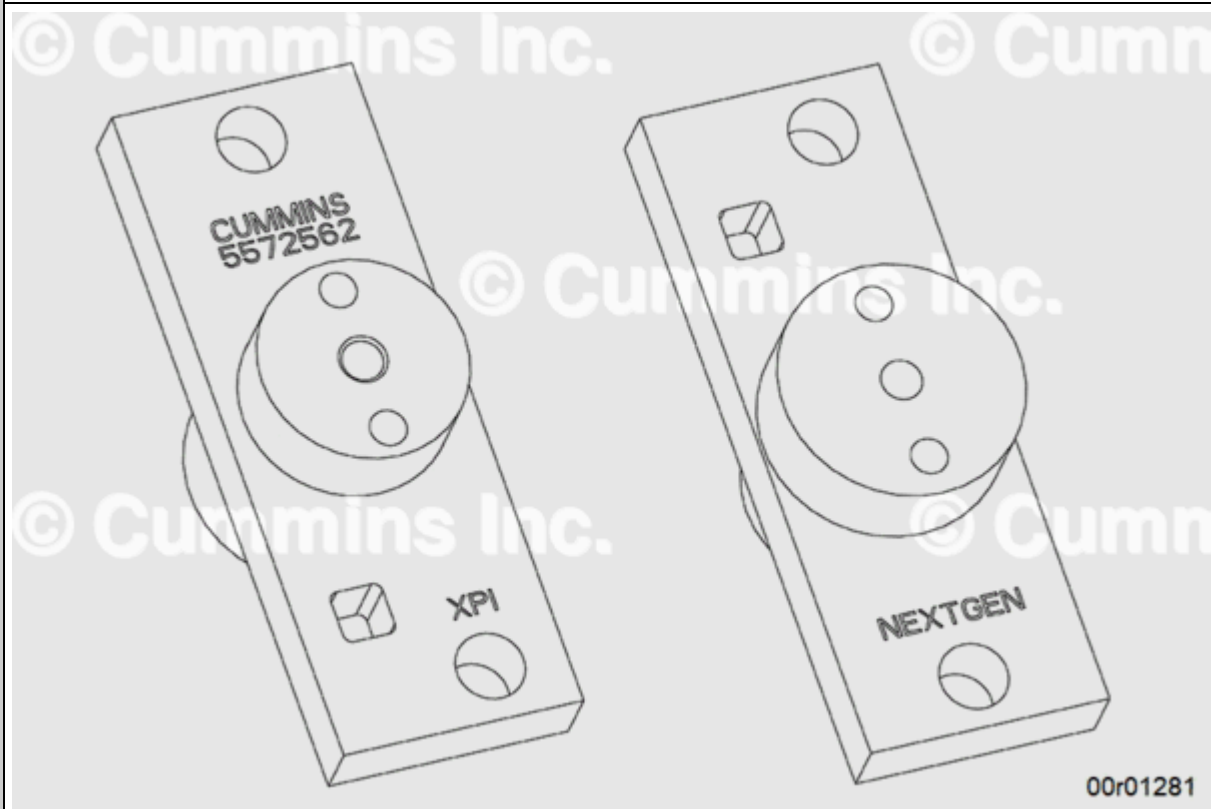

Tool Number

5572664

Fuel Pump Timing Gauge

Used to time fuel pump.

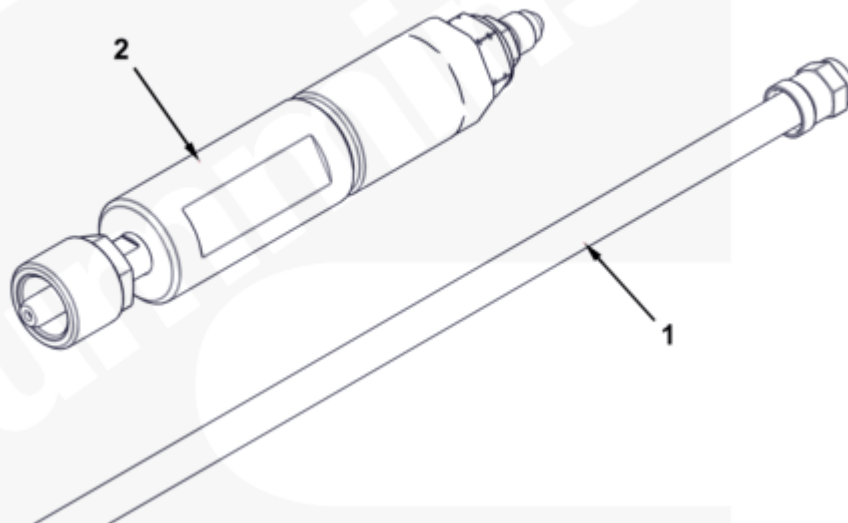

Tool Number

5299721

Fuel Pump Test Kit

Used to measure high pressure fuel pump pressure and volume output. Includes Part Number 3164673, Leak Test Hose (1) and Part Number 5299753, Fuel Pump Tester (2).
