GCS ECM

Circuit Description

The ECM checks to see what other components are installed at power-up, and if the list of installed components does **not** match the calibration, then the ECM will trip Fault Code 1413, Configuration Error.

Component Location

Refer to the OEM manual for location of the ECM.

Shoptalk

Verify that the correct calibration is loaded in the ECM. If it continues replace the ECM.

Refer to Troubleshooting Fault Code t05-1413 (</qs3/pubsys2/xml/en/procedures/01/01-t05-1413.html>)
