

Fault Code: 1417

Controller Power Down Fault

 Printable Version

Overview

Codes	Reason	Effect
Fault Code: 1417 PID(P): SPN: FMI: Lamp: Warning SRT:	A controller power-down error has been detected.	The ECM can not power down because of some unknown condition. Possible drain on battery.

GCS ECM

Circuit Description

The ECM checks during the power-down sequences to see if power is being shut off. If the power line is still hot, it checks for a reason for **not** shutting down. If no reason exists, then there **must** be a problem with the module that is **not** allowing it to power down.

Component Location

Refer to the OEM manual for location of the ECM.

Shoptalk

This fault indicates a hardware failure in the ECM.

Refer to Troubleshooting Fault Code t05-1417 (</qs3/pubsys2/xml/en/procedures/01/01-t05-1417.html>)
