Overview

Codes	Reason	Effect
Fault Code: 1439 PID(P): SPN: FMI: Lamp: Warning SRT:	Fuel level low in day tank.	No action is taken by the ECM. Possible loss of performance.

Day Tank Fuel Level Sensor Circuit

Circuit Description

The fuel level sensor monitors the fuel level within the day tank and passes information to the electronic control module (ECM).

Component Location

Refer to customer/facility/installation documentation for the location of the fuel day tank and the fuel level sensor used on the day tank.

Shoptalk

When the fuel level drops below a certain level in the tank, it could cause the fuel pump to work harder to obtain the desired fuel pressure.

If a shorting plug is used in the fuel level circuit, verify that it is wired correctly.

Inspect all connectors and the sensor pins for damage.

Refer to Troubleshooting Fault Code t05-1439 (</qs3/pubsys2/xml/en/procedures/01/01-t05-1439.html>)
