

Fault Code: 1445

Alternator Short Circuit - Alternator Protection

 Printable Version

Overview

Codes	Reason	Effect
Fault Code: 1445 PID(P): SPN: FMI: Lamp: Shutdown SRT:	Alternator short circuit.	Generator set will shut down.

Alternator Circuit

Circuit Description

The alternator turns the mechanical energy produced by the engine into electrical energy. The ECM monitors the performance and operation of the alternator. The threshold for short circuit condition is 175 percent of rated.

The ECM uses this fault code to inform the operator that a short circuit condition exists in the generator set alternator output circuit.

Component Location

Refer to Section E for location of the alternator. Refer to customer/facility/installation documentation for diagrams on the generator set/electric bus setup.

Shoptalk

Check the load and load lead connections.

Refer to Troubleshooting Fault Code t05-1445 (</qs3/pubsys2/xml/en/procedures/01/01-t05-1445.html>)
