

Fault Code: 1466

Modem-Lost Communication

 Printable Version

Overview

Codes	Reason	Effect
Fault Code: 1466 PID(P): SPN: FMI: Lamp: Warning SRT:	ECM can not communicate with the modem.	No action taken by the ECM.

Modem Circuit

Circuit Description

The ECM checks the modem to make certain it is operating correctly. The ECM uses the modem to inform a remote operator about generator set operation, performance, setup, and diagnostics. The ECM monitors the modem (no communication with the modem will trip Fault Code 1466) and can be caused by shorts or opens.

Component Location

Refer to Section E for location of the modem.

Shoptalk

The possible failure modes are open circuit, short to ground, and loss of supply voltage inside the ECM.

Check for open, short circuit to ground, and loose connections on customer-supplied wiring to the modem.

Refer to Troubleshooting Fault Code t05-1466 (</qs3/pubsys2/xml/en/procedures/01/01-t05-1466.html>)
