

Fault Code: 1494

Modem Power Relay Driver Diagnostic

 Printable Version

Overview

Codes	Reason	Effect
Fault Code: 1494 PID(P): SPN: FMI: Lamp: Warning SRT:	Modem power relay driver diagnostic has detected an error.	Modem will not function correctly. No action taken by ECM. No loss of performance.

Modem Power Relay Driver Circuit

Circuit Description

The ECM checks the modem power relay driver to ensure correct operation. The ECM uses the modem to inform a remote operator about generator set operation, performance, setup, and diagnostics. The ECM monitors the voltage (no voltage increase will trip Fault Code 1494) caused by short circuits, open circuits, or failed modem power relay driver in the ECM.

Component Location

Refer to site documentation for location of the modem.

Shoptalk

Possible failure modes are open circuits, short circuits, short to ground, and loss of supply voltage inside the ECM.

Refer to Troubleshooting Fault Code t05-1494 (</qs3/pubsys2/xml/en/procedures/01/01-t05-1494.html>)
