Exercise LED Driver Circuit

Circuit Description

The ECM checks the Exercise LED driver to ensure correct operation. The ECM uses Exercise lamp to inform the operator if the generator set is in exercise mode.

Component Location

Refer to section E for location of the switch panel, and Exercise lamp.

Shoptalk

Possible failure modes are open circuits, short to ground, burned-out LED, and loss of supply voltage inside the ECM.

Proper diagnostic lamp operation can be verified by checking to see that the lamps briefly light when the ECM is powered up.

Refer to Troubleshooting Fault Code t05-1498 (</qs3/pubsys2/xml/en/procedures/01/01-t05-1498.html>)
