

Fault Code: 555

Blowby Pressure - Warning Level

 Printable Version

Overview

Codes	Reason	Effect
Fault Code: 555 PID(P): SPN: FMI: Lamp: Warning SRT:	Engine blowby - warning level. Voltage signal indicates blowby pressure has exceeded the warning threshold for high blowby.	Calibration-dependent engine shutdown or no action is taken by ECM.

Blowby Pressure Sensor Circuit

Circuit Description

The blowby pressure sensor is used by the electronic control module (ECM) to monitor the engine crankcase pressure. The ECM monitors the voltage on the signal pin and converts this to a pressure value. The blowby pressure value is used by the ECM for the engine protection system.

Component Location

Refer to the Engine Diagrams. 100-002 (/qs3/pubsys2/xml/en/procedures/01/01-100-002.html) for the component location.

Shoptalk

Confirm that the crankcase breathers and breather tubes are **not** obstructed.

Refer to Troubleshooting Fault Code t05-555 (/qs3/pubsys2/xml/en/procedures/01/01-t05-555.html)
