

## Trainings ▾

### Engine Dataplate

The engine dataplate provides the model identification and other important information about the engine.

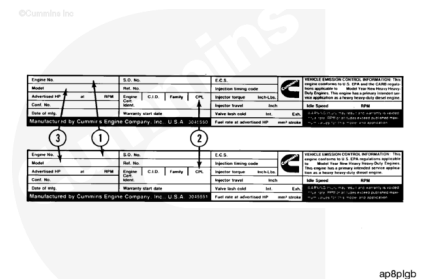

The engine serial number and CPL provides data for ordering parts and service.

The dataplate is located on the fuel pump side of engine on the rocker lever housing.

The following information on the dataplate is mandatory when sourcing service parts.

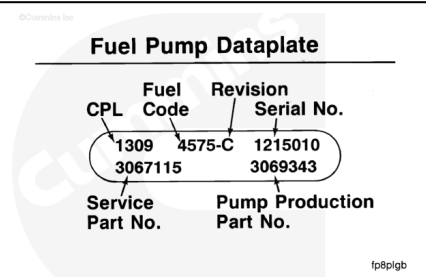

- (1) **Engine Serial Number**
- (2) **Control Parts List**
- (3) **Model.**

### Fuel Pump Dataplate

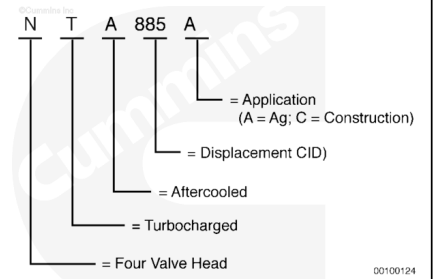

The fuel pump dataplate is located on the top of the fuel pump.

The fuel pump dataplate provides information for calibration.

## Cummins® Engine Nomenclature

The Cummins® engine nomenclature provides the data as illustrated in the graphic.
