

Fault Code: 4615

Fuel Pump Delivery Pressure - Data Valid But Above Normal Operating Range - Most Severe Level

 Printable Version

Overview

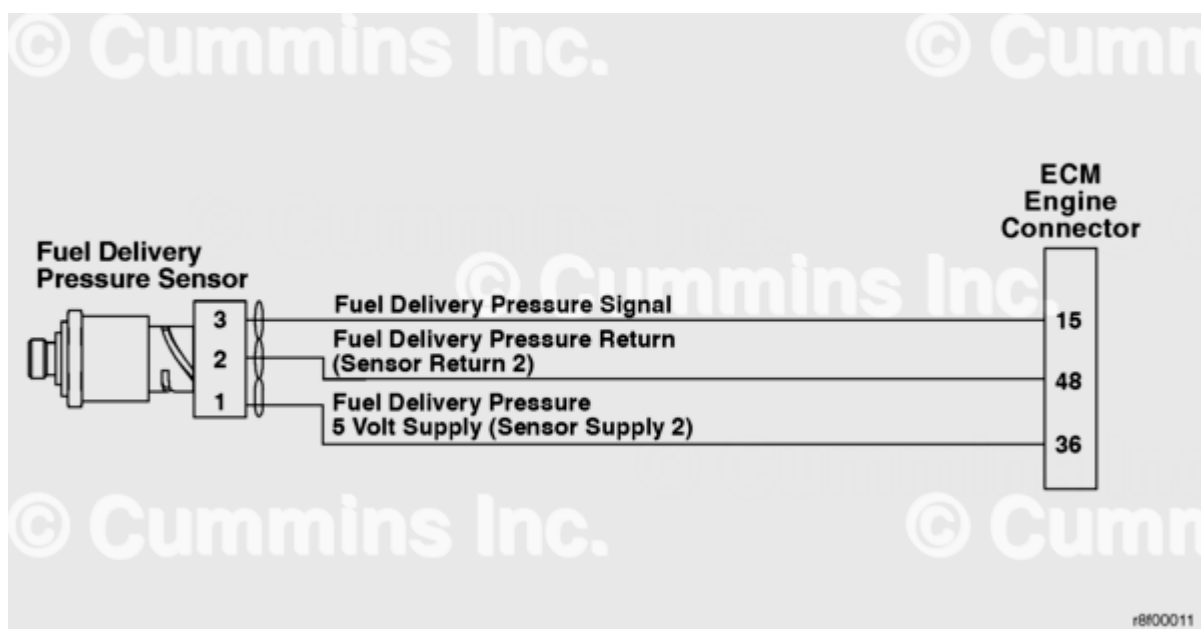

Codes	Reason	Effect
Fault Code: 4615 PID(P): SPN: 94 FMI: 0/0 Lamp: Amber SRT:	Fuel Pump Delivery Pressure - Data Valid But Above Normal Operating Range - Most Severe Level. The fuel pump supply pressure is very high.	Low power or engine smoke.

QSK19 CM2150 Industrial - Fuel Delivery Pressure Sensor Circuit

QSK19 CM2150 Marine- Fuel Delivery Pressure Sensor Circuit

QSK19 CM2150 Power Generation - Fuel Delivery Pressure Sensor Circuit

Circuit Description

The fuel delivery pressure sensor is used by the engine control module (ECM) to monitor fuel delivery pressure directly before the Stage 2 filter. The ECM monitors the voltage on the SIGNAL pin and converts this to a pressure value.

Component Location

The fuel delivery pressure sensor is located in the Stage 2 fuel filter head. Refer to Procedure 100-002 in Section E. (</qs3/pubsys2/xml/en/procedures/123/123-100-002-tr.html>)

Shoptalk

Possible causes of this fault code include:

- Stage 2 fuel filter restriction
- Pinched or damaged fuel supply line
- Stuck gerotor pump fuel pressure regulator located in the high-pressure pump.

Refer to Troubleshooting Fault Code t05-4615. (</qs3/pubsys2/xml/en/procedures/123/123-t05-4615.html>)
