- No additional service items required.

General Information

PS102

The C Command Connect and Connect Premier start/stop switch (1) is located on the customer interface box (CIB).

The switch is pressed and held to start the engine. A single quick press of the start switch will engage the starter but will **not** start the engine.

Use the following procedure for details, removal, inspection, and installation information. Refer to Procedure 015-023 in Section 15 (</qs3/pubsys2/xml/en/procedures/513/513-015-023.html>).

PS103

Some applications will use a single press start/stop switch. A single quick press up of the start/stop switch (1) will engage the starter, and start the engine. If the start/stop switch is pressed while the engine is running, the engine will shutdown.

Refer to Procedure 015-101 in Section 15.

(</qs3/pubsys2/xml/en/procedures/513/513-015-101.html>)
