Flow Diagram

with Mechanically Actuated Injector

Fuel System - Industrial and Power Generation

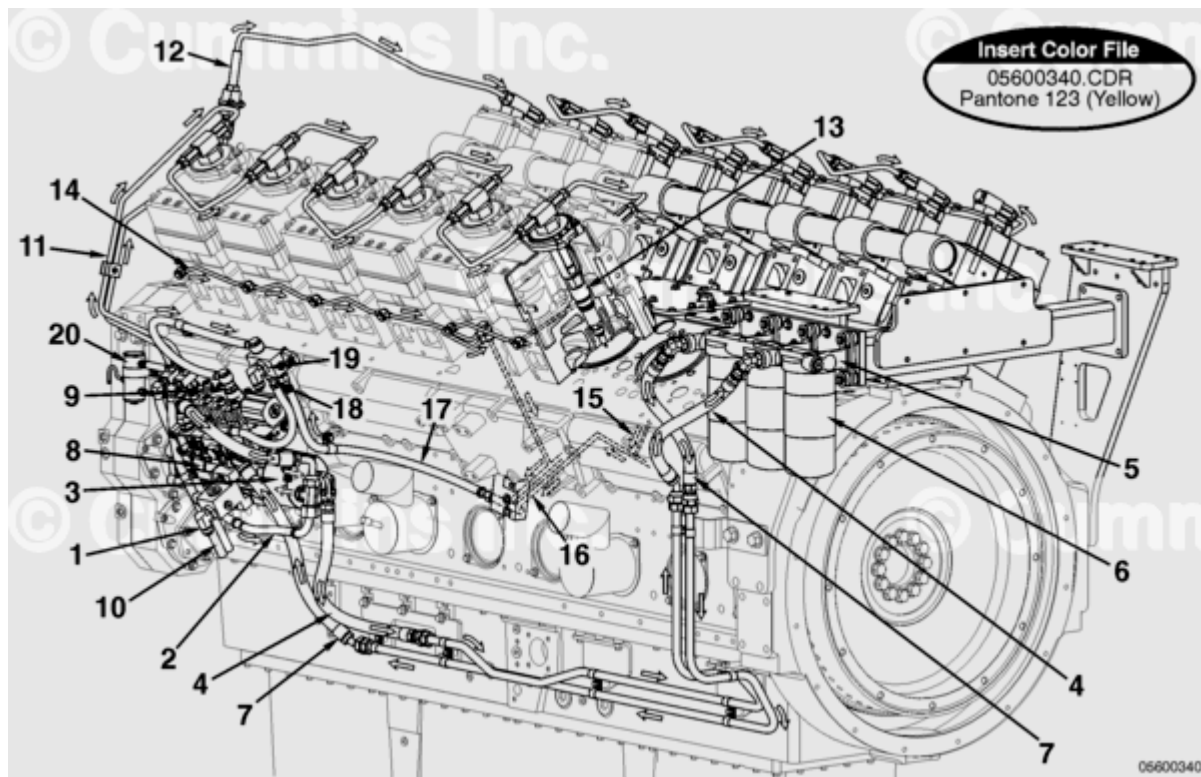

1. Fuel inlet from tank
2. Fuel filters
3. Fuel supply to fuel pump
4. Fuel flow through fuel shutoff valve to engine
5. Fuel supply from fuel pump to fuel shutoff valve
6. Fuel supply to left bank fuel block
7. Fuel rail supply to injectors
8. Fuel manifold
9. Fuel drain
10. Fuel block
11. Fuel timing supply to injectors
12. Injector
13. Right bank fuel drain
14. Left bank fuel drain
15. Fuel supply to right bank fuel block
16. Fuel drain to fuel tank.

QSK60 Fuel System - Marine with Mechanically Actuated Injector

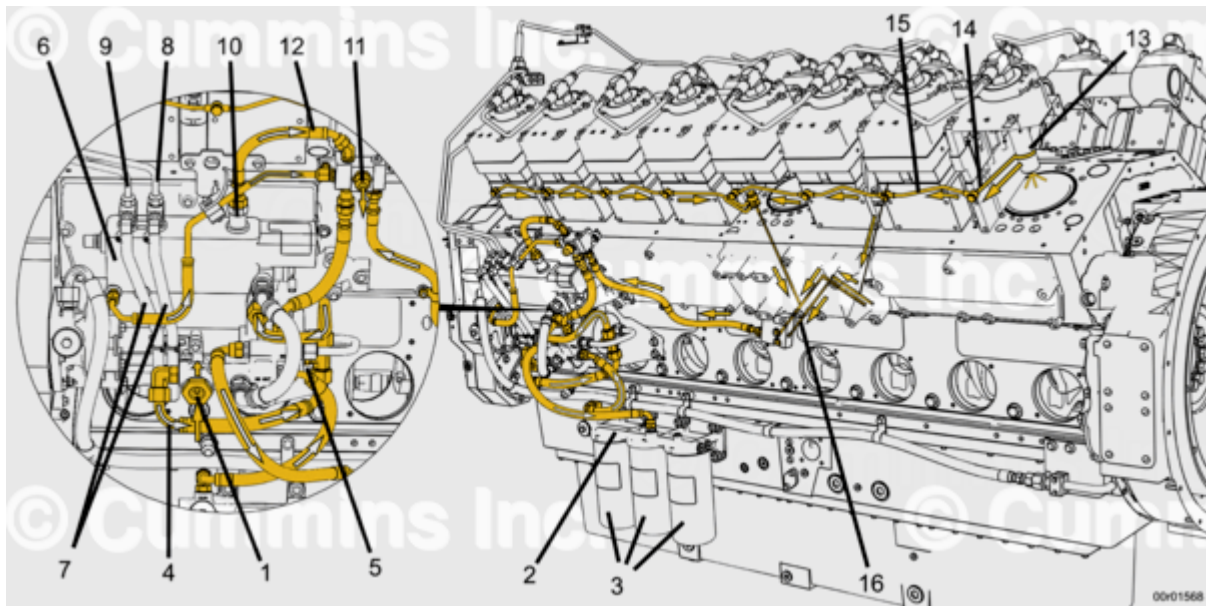

1. Fuel inlet from fuel tank
2. Fuel filters
3. Fuel supply to fuel pump
4. Fuel pump
5. Fuel supply to electronic control valve assembly
6. Electronic control valve assembly
7. Fuel supply to left bank fuel block
8. Fuel supply to right bank fuel block (internal)
9. Fuel block
10. Fuel manifold
11. Fuel rail supply to injector
12. Injector
13. Fuel timing supply to injector
14. Balancing tube
15. Left bank fuel drain
16. Right bank fuel drain
17. Fuel drain to fuel cooler
18. Fuel cooler (optional)
19. Fuel drain to fuel tank.

with Electronically Actuated Injector

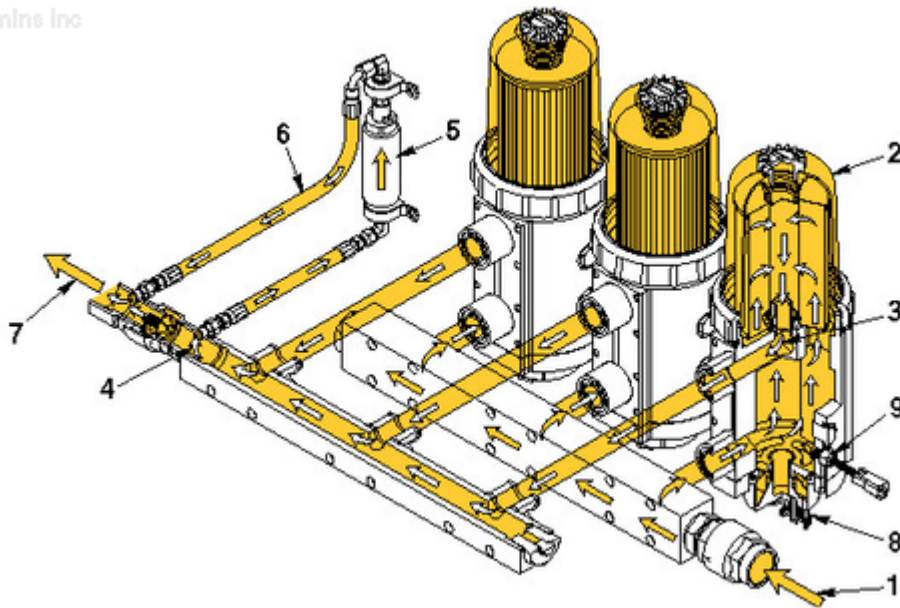

QSK60 Stage 2 Fuel Filtration

1. Fuel supply from OEM fuel tank
2. Fuel flow to high pressure fuel pump
3. High pressure fuel pump
4. Fuel flow to fuel filter head assembly
5. Fuel filter head assembly (Location dependent on application. Marine application shown).
6. Second stage fuel filters
7. Fuel flow to fuel pump
8. Fuel pump
9. Mechanical dump valve
10. Vents for injector supply line
11. Left bank injector supply line
12. Right bank injector supply line
13. Injector
14. Injector fuel drain left bank
15. Injector fuel drain right bank
16. Fuel return flow drain right bank
17. Fuel return line
18. Air bleed check valve
19. Fuel return to OEM fuel tank
20. Fuel leak detector (Marine optional for alarm and safety system).

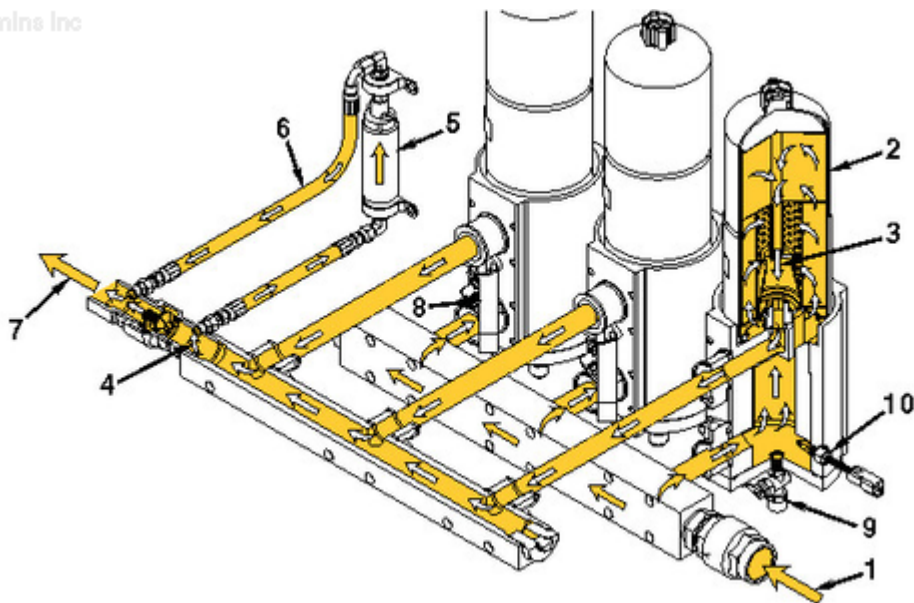

For Generator Model DQKAN with Low NOx Emissions Capability

1. Fuel supply from tank
2. Fuel filter head assembly
3. First stage fuel filters
4. Second stage fuel filters
5. Fuel supply to gerotor pump
6. Gerotor pump
7. High Pressure fuel pump
8. Mechanical dump valve
9. Vents for injector supply lines
10. Left bank injector supply line
11. Right bank injector supply line
12. Fuel return to OEM fuel tank
13. Air bleed check valve
14. Injector
15. Fuel return line
16. Fuel return flow from right bank
17. Fuel return flow from left bank.

Stage 1 Triple Fuel Filter

1. Fuel inlet from tank
2. Filter
3. Fuel from filter to manifold
4. Fuel inlet to lift pump
5. Lift pump
6. Fuel outlet from lift pump
7. Fuel outlet to Stage 2 filters
8. Accumulated water drain valve
9. Water in fuel (WIF) sensor.

Stage 1 Triplex Fuel Filters

1. Fuel inlet from tank
2. Filter
3. Fuel from filter to manifold

4. Fuel inlet to lift pump
5. Lift pump
6. Fuel outlet from lift pump
7. Fuel outlet to Stage 2 filters
8. Select valve (on/off)
9. Accumulated water drain valve
10. Water in fuel (WIF) sensor.
