New MidRange Machined-from-Solid Turbocharger Compressor Wheel

New MidRange Machined-from-Solid Turbocharger Compressor Wheel

Warranty Statement

The information in this document has no effect on present warranty coverage or repair practices, nor does it authorize TRP or Campaign actions.

Contents

This Technical Service Bulletin announces a new machined-from-solid turbocharger compressor wheel for certain MidRange engine and application combinations. The new turbocharger compressor wheel addresses low-cycle fatigue mode issues.

The previous compressor wheel is a cast design with the outer blade contour machined to achieve the desired profile. The sides of the cast wheel blades are in the 'as cast' condition.

The new compressor wheel is a machined-from-solid design which is created by machining the wheel from a solid billet of aluminum. All surfaces of the machined-from-solid wheel are machined.

This product improvement is **not** covered by warranty.

Only certain, high-duty cycle applications are eligible to receive machined-from-solid turbocharger compressor wheels.

Only certain high-duty cycle applications are subject to a TRP. In most instances, cast compression wheels have **not** been obsoleted and superseded.

Consult QuickServe® Online to determine if a given engine and application combination is eligible to receive this product improvement.

Note : This is a product improvement and not subject to campaign.

The compatibility chart below shows the machined-from-solid turbocharger compressor wheels that can potentially be used with the CPLs listed.
