This Technical Service Bulletin describes the release of a revised design for the Wabco™ single cylinder air compressor used on heavy-duty and midrange applications. Refer to the matrix (see Table 1) as multiple part numbers are being obsoleted and superseded for the unique engine families. This change affects the following engines:

- ISX and QSX15 engines
- ISM, ISMe, and QSM11
- C Series engines (6C and C8.3)
- ISC, QSC8.3 engines
- ISL, ISL ^e3, and QSL9 engines.

Wabco™ began production of the new air compressor head design on 15-December-2005. The revised design utilizes a balanced power reduction (BPR) design that works in conjunction with the higher boost pressures associated with exhaust gas recirculation (EGR) engines and with Non EGR engines built after October 2002. Due to the higher boost pressures, some unloader assemblies would go into rapid oscillation and allow the unloader plate to fret against the aluminum cylinder head in some applications. This unloader valve fretting leads to no pump and slow to build air complaints.

All Wabco™ single cylinder air compressors built prior to 16-December-2005 did **not** utilize the balanced power reduction (BPR) design. Single cylinder air compressors built after 16-December-2005 utilize the balanced power reduction (BPR) design.

Engines built after their respective implementation dates (see Table 1) were produced with a new Wabco™ single cylinder air compressor, which features the modified unloader valve assembly. The engine serial number (ESN) First for each engine family can be found in the part number matrix (see Table 1).

For proper air compressor installation, reference Procedure 012-014 in one of the following service publications:

- Service Manual, ISM, ISMe, and QSM11 Engines, Bulletin 3666322 (</qs3/portal/manualviewer.html?path=/qs3/pubsys2/xml/en/outlines/3666322.html>)
- Service Manual, ISX and QSX15 Engines, Bulletin 3666239 (</qs3/portal/manualviewer.html?path=/qs3/pubsys2/xml/en/outlines/3666239.html>)
- Troubleshooting and Repair Manual, C Series Engines, Bulletin 3666003 (</qs3/portal/manualviewer.html?path=/qs3/pubsys2/xml/en/outlines/3666003.html>)
- Troubleshooting and Repair Manual, ISC, ISC ^e, QSC8.3, ISL, ISL ^e3, and QSL9 Engines, Bulletin 4021418 (</qs3/portal/manualviewer.html?path=/qs3/pubsys2/xml/en/outlines/4021418.html>).

Table 1 lists part number matrices for the Wabco air compressor assemblies.
