Issue Summary

Symptom:

- Recurring coolant leaks after switching to organic acid technology (OAT) coolant.

Root Cause:

- The previously used gasket material is incompatible with OAT coolant.

Verification

Visually verify that there are leaks at the gaskets. Verify that the engine has OAT coolant. Verify that the gaskets are incompatible with OAT coolant using part number identification on the gasket.

Resolution

Replace malfunctioning gasket made from the previously incompatible material with gasket manufactured from nitrile-based material, which is proven to be compatible with OAT coolant. Replace malfunctioning gasket with the superseded gasket equivalent. Refer to Table 1.

Service Parts

Service parts are offered. See Table 1 for part numbers.
